Abstracts

REPORT SCOPE:

The report addresses the global market for nanocomposites. Nanocomposites are a class of composites that have at least one component with nanoscale dimensions or structural features. This study, however, excludes certain materials (e.g., rubber, to which carbon black nanoparticles have been added) that technically fit the definition of nanocomposites but have been in commercial use for decades.

REPORT INCLUDES:

119 data tables and 10 additional tables

An overview of the global market for nanocomposites, nanoparticles, nanoclays, and nanotubes

Analyses of global market trends, with data from 2016, estimates for 2017, and projections of compound annual growth rates (CAGRs) through 2022

Details on nanocomposites that are in commercial use or under development, as well as associated technologies and relevant applications

Information on the industry's structure as well as about factors that will influence the long-term development of these markets

Breakdowns of the market by share

Analysis of the market's dynamics, specifically growth drivers, restraints, and opportunities

Profiles of leading companies in the market, including Agilent Technologies, Alps Electric Co., Ltd., Bayer AG, Foster Corp. and Evonik Industries AG
