Report Scope:

The report analysis the global nitrogen gas market based on segmentation of form, end user and distribution channel. These segmentations are further analyzed at global, regional and country levels.

The base year considered for analyses is 2021, while the market estimates and forecasts are given from 2022 to 2027. The market estimates are only provided in terms of revenue in USD millions.

As the family of nitrogen gas is extremely vast in nature, we will only be considering nitrogen gas of purity 95% and above, in order to provide high accuracy and clarity. In addition to this, we have excluded all mixed gases and included only pure nitrogen gas. Revenue generated from sales of nitrogen generators is also excluded.

The scope of end-user industries includes -

Food and beverages -

Alcoholic and non-alcoholic beverages.

Fresh and packaged food processing, storage and packaging.

Chemicals and refining (include downstream-refining and petrochemicals):

Chemical blanketing.

Fire protection.
