Abstracts

REPORT INCLUDES:

An overview of the pandemic outbreaks occurred over the last decade (2010-2020)

Discussion of several serious epidemiological outbreaks, their socioeconomic impact, R&D efforts, treatment and diagnostics, clinical trial landscape, and regulatory and reimbursement landscape

Data corresponding to number of confirmed cases and reported deaths (globally and country wise) due to various pandemics, including novel coronavirus disease (COVID-19), SARS, MERS, HIV/AIDS, H1N1, Ebola virus etc.

Correlation of coronavirus (Covid-19) outbreak to previous epidemiological outbreaks in terms of policies and measures of prevention and control, and the lessons learned thereafter

Insight into key scientific breakthroughs and pipeline products targeting infectious disease treatments, including the novel coronavirus disease and its antibody-based clinical program (antibody to MERS-CoV infection)
