Abstracts

REPORT SCOPE:

This new report on pediatric medicine will provide a brief overview on the current status of the industry and recent developments. It presents the changing environment in terms of new legislation and implementation of global pediatric plans. The report analyzes market trends and identifies key therapeutic and geographical challenges and rising opportunities in the developed and developing world. Finally, the report provides insights on how all stakeholders have an essential interest in prioritizing pediatric drug development targets and improving access to safe and effective medicines to children across the globe.

REPORT INCLUDES:

55 tables

An overview of the global markets for pediatric medicines within the pharmaceutical industry

Analyses of the global market trends, with data from 2018, estimates for 2019, and projections of compound annual growth rates (CAGRs) through 2024

Discussion on market drivers, off-label use, novel formulations and areas of unmet clinical need and emerging countries

Market analysis for therapeutic fields including neonates and paediatrics childhood cancers, CNS disorders, infectious diseases, immune inflammatory diseases, metabolic diseases, respiratory conditions, vaccinations

Regulatory environment and incentives for pediatric development

Profiles of major companies of the industry, including Abbott Laboratories, GlaxoSmithKline, Novartis AG, Sanofi and Vertex Pharmaceuticals Inc.
