Report Scope:

This BCC Research study provides in-depth coverage of many of the most important technological, economic, political, and environmental considerations in the U.S. barrier packaging polymer industry. It is primarily a study of U.S. markets. However, because of the increasingly global nature of polymer and packaging chemistry, it touches on some noteworthy international activities, primarily those having an impact on the U.S. market, such as imports/exports and foreign firms operating in this country.

We analyze and forecast market estimates for barrier packaging plastic resins in volume (million pounds). Our base market estimate year is 2021, and we forecast market growth for a five-year period to 2027. All market volumes are at the manufacturer or producer level.

Report Includes:
