Abstracts

Report Scope:

For the purposes of this report, the term “recycling” refers to the removal of products from the waste stream for uses not including incineration or energy recovery. Any secondary uses or reuse of the material is assumed to have already taken place. The term “recovery” is taken to include all disposal methods except land disposal (i.e., recycling, incineration, waste-to-energy [WTE]).

The term “chemical recycling” will be used to describe the return to chemical units originally used to make resins. Nylon can be depolymerized to caprolactam. The term “feedstock recycling” will be used to denote the process of decomposing plastics to a mix of organic chemicals, some used in the manufacture of plastics and some not. Feedstock recycling products are more akin to the raw materials used to produce plastics (e.g., petroleum, natural gas).

Mechanical recycling methods include those that involve physical modifications to the recovered plastic only, such as separation, grinding and classifying.

The report will be concerned with activities in four regions: North America, Europe, the Asia region and the Rest of the World (ROW). All figures are reported to the nearest million dollars or million or billion pounds. Growth rates given are compound annual growth rates (CAGRs) for the period from 2017 to 2023. All value figures noted are in constant 2017 U.S. dollars.

The market data in the tables of this report only cover post-consumer plastics. Post-industrial plastics are not included.

The report is divided into several sections. The Introductory section summarizes the

study's goals and objectives, the reasons for doing the study and scopes. The Summary and Highlights section provides a brief summary of estimates and forecasts of the global plastics recycling market from 2017 through 2023 and highlights of largest and fastest-growing markets and important trends.

The Overview section describes the manufacture of plastics, the major types of plastics used, the ways in which plastics are disposed after use and a summary of recycling methods.

The Global Market section describes existing markets by product sources. Recycled waste products include bottles, vehicles, carpet and electronics. This section covers topics such as the amount of plastic annually collected and recycled from these sources, and when possible, it offers a prediction regarding the probable growth rate over the next five years.

The Global Market section also looks at plastics recycling by resin, summarizing the sources and end uses for recycled materials that are available. Most recycled polyethylene terephthalate (PET) comes from PET bottles, and the main end market for recycled PET bottle resin is fibers.

The Global Market section also profiles products made with recycled plastics, including applications such as plastic lumber and plastic composites (e.g., wood, fibers, cement, glass). Products are covered separately, as they may be made from plastic from a combination of sources. Wood/fiber plastic composites may be made from several different resin types, each possibly derived from several different products.

After the global market sections, there will be four chapters that discuss the regional plastics recycling markets: North America, Europe, the Asia region and ROW.

The Company Profiles section lists relevant organizations and companies.

The Appendix provides definitions of abbreviations and acronyms.

Market values and volumes have specific measurements.

Market values are measured at the level of plastic recycled, such as the values of recycled resin pellets.

The market volumes by end use or application are measured at the levels of both the

amount of plastic available for recycling and the amount of plastic that is recycled.

The market volumes by sources of waste (e.g., bottles, films.) are measured at the level of the amount of plastic available for recycling.

The market volume is segmented by resin types of waste (e.g., PET, PE.) and measured at the level of the amount of plastic available for recycling.

Report Includes:

96 data tables

An overview of the global markets for plastic recycling

Analyses of global market trends, with data from 2017, 2018, and projections of compound annual growth rates (CAGRs) through 2023

Discussion on the history and current state of plastic recycling market, and future trends

Insight into the government regulations and targets of the plastic recycling industry

Company profiles of the industry including JK Plastics Pty. Ltd., PET Recycling Company (PETCO), LyondellBasell, Geo-Tech Polymers, Phoenix Technologies International, LLC and MBA Polymers Inc.

Contents

CHAPTER 1 INTRODUCTION

Study Goals and Objectives
Reasons for Doing This Study
Scope of Report
Target Audience of the Study
Methodology and Information Sources
Geographic Breakdown
Analyst's Credentials
BCC Custom Research
Related BCC Research Reports

CHAPTER 2 SUMMARY AND HIGHLIGHTS

Summary
Highlights
Largest and Fastest Growing Market
Market Attractiveness

CHAPTER 3 OVERVIEW OF PLASTICS RECYCLING

Background
Factors Affecting the Economics of Plastics Recycling
Plastics Recycling Industry
How Plastics are Made
Classifications of Plastics
End Use Market

CHAPTER 4 GLOBAL MARKETS FOR PLASTICS RECYCLING

Global Plastics Recycling Market by Region
Global Plastics Recycling Market by Source
Bottles
Films
Automotive
Electrical and Electronics
Global Plastics Recycling Market by Resin

Polyethylene Terephthalate
High-Density Polyethylene
LDPE and LLDPE
Polypropylene
Polyvinyl Chloride
Polystyrene
Polyurethane
Polycarbonate
Mixed Resins
Global Plastics Recycling Market by End Use
Consumer Products
Building Products
Automotive
Industrial and Commercial

CHAPTER 5 ASIAN MARKET FOR PLASTICS RECYCLING

Chinese Plastics Recycling Market
Laws and Regulations
History and Current Situations
Chinese Plastics Recycling Market by Source
Chinese Plastics Recycling Market by Resin
Chinese Plastics Recycling Market by End Use
Indian Plastics Recycling Market
Indian Plastics Recycling Market by Source
Indian Plastics Recycling Market by Resin
Indian Plastics Recycling Market by End Use
Vietnamese Plastics Recycling Market
Vietnamese Plastics Recycling Market by Source
Vietnamese Plastics Recycling Market by Resin
Vietnamese Plastics Recycling Market by End Use
Indonesian Plastics Recycling Market
Indonesian Plastics Recycling Market by Source
Indonesian Plastics Recycling Market by Resin
Indonesian Plastics Recycling Market by End Use
Malaysian Plastics Recycling Market
Malaysian Plastics Recycling Market by Source
Malaysian Plastics Recycling Market by Resin
Malaysian Plastics Recycling Market by End Use

Thai Plastics Recycling Market
Thai Plastics Recycling Market by Source
Thai Plastics Recycling Market by Resin
Thai Plastics Recycling Market by End Use
Japanese Plastics Recycling Market
Laws and Regulations
Japanese Plastics Recycling Market by Source
Japanese Plastics Recycling Market by Resin
Japanese Plastics Recycling Market by End Use

CHAPTER 6 EUROPEAN MARKET FOR PLASTICS RECYCLING

European Laws and Targets
Industrial Trends
German Plastics Recycling Market
German Plastics Recycling Market by Source
German Plastics Recycling Market by Resin
German Plastics Recycling Market by End Use
French Plastics Recycling Market
French Plastics Recycling Market by Source
French Plastics Recycling Market by Resin
French Plastics Recycling Market by End Use
Italian Plastics Recycling Market
Italian Plastics Recycling Market by Source
Italian Plastics Recycling Market by Resin
Italian Plastics Recycling Market by End Use
Spanish Plastics Recycling Market
Spanish Plastics Recycling Market by Source
Spanish Plastics Recycling Market by Resin
Spanish Plastics Recycling Market by End Use
U.K. Plastics Recycling Market
U.K. Plastics Recycling Market by Source
U.K. Plastics Recycling Market by Resin
U.K. Plastics Recycling Market by End Use

CHAPTER 7 NORTH AMERICAN MARKETS FOR PLASTICS RECYCLING

U.S. Plastics Recycling Market
Current Situation

Laws and Regulations
U.S. Plastics Recycling Market by Source
U.S. Plastics Recycling Market by Resin
U.S. Plastics Recycling Market by End Use
Canadian Plastics Recycling Market
Canadian Plastics Recycling Market by Source
Canadian Plastics Recycling Market by Resin
Canadian Plastics Recycling Market by End Use

CHAPTER 8 REST OF THE WORLD MARKET FOR PLASTICS RECYCLING

Mexican Plastics Recycling Market
Mexican Plastics Recycling Market by Source
Mexican Plastics Recycling Market by Source
Mexican Plastics Recycling Market by End Use
South African Plastics Recycling Market
South African Plastics Recycling Market by Source
South African Plastics Recycling Market by Resin
South African Plastics Recycling Market by End Use
Brazilian Plastics Recycling Market
Brazilian Plastics Recycling Market by Source
Brazilian Plastics Recycling Market by Resin
Brazilian Plastics Recycling Market by End Use
Australian Plastics Recycling Market
Australian Plastics Recycling Market by Source
Australian Plastics Recycling Market by Resin
Australian Plastics Recycling Market by End Use
