REPORT SCOPE:

The scope of this report includes an analysis of the prepreg carbon fiber applications markets. This report includes those products and materials that are typically used in extreme conditions like high temperatures or which provide additional enhanced properties when compared to traditional products.

This report analyzes market trends and provides perspective for end use industries where these products are used. Industries discussed in this report are aerospace and defense, industrial, energy, infrastructure, sporting goods, transportation and others. Market share estimates for each are provided.

The scope of this report also includes the top eight companies in the prepreg carbon fiber market and the key areas in the field that are driving industry growth. This report explores industry structure and notes strategic alliances and acquisitions.

This report provides analyses of global market trends, with data from 2018 to 2024 and compound annual growth rate (CAGR) projections from 2019 to 2024. Estimated values used are based on manufacturer total revenues. Projected and forecasted revenue values are in constant US dollars, unadjusted for inflation.

REPORT INCLUDES:

An overview of top eight prepreg carbon fiber companies and discussion on their main business segments, details of products, and financial performance

Coverage of recent market trends in overall prepreg carbon fiber industry

Analyses of global market trends, with data from 2018, estimates for 2019, and projections of compound annual growth rates (CAGRs) through 2024

Identification of prepreg carbon applications with the greatest commercial potential during the forecast period

Impact analyses of the key drivers and constraints

Information on legal and regulatory factors and economic factors related to this industry
