## Abstracts

### Report Scope:

The protein analysis market has significant potential bolstered by the rising demand from drug discovery and personalized medicine. The capabilities and possibilities of protein analysis market growth increase with growing new technologies and technological advancement in the market. Emerging economies such as China, Japan and South Korea are considered to be lucrative regions that are creating ample opportunities and scope for the protein analysis market. This market is expected to obtain investments and funding from government and private ventures, research institutes and universities to explore its potential. Growing clinical trials, drug discovery and clinical diagnostic and research through the protein analysis market will further boost this market in the near future. Sedentary lifestyles, unhealthy eating habits and upsurge in infectious viral and bacterial diseases are also creating opportunities for the protein analysis market. The global rise in infectious and noninfectious diseases, growing population, technological advancements and innovation are some other factors creating considerable demand within the protein analysis market.

The scope of this study covers the current market for drug discovery, clinical diagnostic and research into personalized medicine and so forth. The report also includes regulatory aspects, current and developing technologies, market projections and market share. Patents, clinical trials, innovations and opportunities, as well as the latest trends are also analyzed and discussed. The report intends to explain the key trends of protein analysis technologies. It also discusses the market determinants that act as motivating and restraining factors and provides insights to stakeholders and potential entrants. The report will be a key decision-making tool for government organizations, researchers, private players, angel investors, potential entrants and so forth.

### Report Includes:

56 data tables and 37 additional tables

An overview of the global market for protein analysis and oncoproteomics within the biotechnology industry

Analyses of global market trends with data from 2017, estimates for 2018, and projections of compound annual growth rates (CAGRs) through 2023

Coverage of the current market for drug discovery, clinical diagnostic and research into personalized medicine and so forth

Discussion of factors such as global rise in infectious and noninfectious diseases, growing population, technological advancements and innovation, which create considerable demand within the protein analysis market

Relevant patents analysis, clinical trials, innovations and opportunities

Evaluation of key trends, present and future market strategies, technological advancements, and regulatory updates that have a major say in the protein analysis market

Company profiles of the leading industry players, including Bio-Rad Laboratories Inc., Danaher Corp., GE Healthcare, GlaxoSmithKline PLC, GD Biosciences and Pfizer

### **CHAPTER 2 SUMMARY AND HIGHLIGHTS**

### **CHAPTER 3 MARKET AND TECHNOLOGY BACKGROUND**

Driving Forces  
Ongoing Research in Personalized Medicine  
Aging Population and Increase in Lifestyle-Related Diseases  
Rising Healthcare and R&D Expenditures  
Restraints  
Tough Regulatory Approvals  
High Cost of Protein Analysis Instruments and Equipment  
Opportunities  
Technological Advancements  
Emerging Markets  
Protein Analysis  
Technology Platforms  
Biochip-based Protein Analysis Technologies  
Onco-Protein Analysis

### **CHAPTER 4 MARKET BREAKDOWN BY END USE**

Drug Discovery and R&D  
Clinical Diagnosis  
Others

## **CHAPTER 5 MARKET BREAKDOWN BY INSTRUMENTATION/REAGENT TECHNOLOGY**

Mass Spectrometry  
Mass Spectrometry Imaging  
Biochips  
Protein Microarrays  
Chromatography  
Microscale Thermophoresis  
NMR Spectroscopy  
Electrophoresis  
Capillary Electrophoresis  
Others  
X-Ray Crystallography Instrumentation  
Protein Fractionation

## **CHAPTER 6 MARKET BREAKDOWN BY TYPE OF DISEASE/DIAGNOSTIC**

Cancer  
Bladder Cancer  
Breast Cancer  
Colorectal Cancer  
Gastric Cancer  
Kidney Cancer  
Lung Cancer  
Lymphoma Cancer  
Ovarian Cancer  
Pancreatic Cancer  
Prostate Cancer  
Thyroid Cancer
