Abstracts

Summary:

This report provides an in-depth analysis of the renewable energy market in the Middle East and North Africa (MENA) region, using 2024 as the base year and forecasting trends from 2025 to 2030, with estimations of compound annual growth rates (CAGR).

This report comprehensively analyzes the renewable energy market across the Middle East and North Africa (MENA) region, with 2024 as the base year and market projections extending through the end of 2030. It offers detailed insights into key growth indicators, including market size, segmentation, and compound annual growth rates (CAGR) across various renewable energy segments. The study evaluates market trends, policy frameworks, investment flows, and technological innovations shaping the adoption of renewable energy across the region.

Report Scope

This report comprehensively analyzes the renewable energy market across the Middle East and North Africa (MENA) region, with 2024 as the base year and market projections extending through the end of 2030. It offers detailed insights into key growth indicators, including market size, segmentation, and compound annual growth rates (CAGR) across various renewable energy segments. The study evaluates market trends, policy frameworks, investment flows, and technological innovations shaping the adoption of renewable energy across the region.

The report is segmented by source, including solar, wind, hydro, and bioenergy and end-user sectors such as residential, commercial, and utility-scale applications. It also

explores distribution models and market entry strategies relevant to industry stakeholders.

To maintain a focused and relevant analysis, the report excludes Turkey and Israel, whose renewable energy sectors are significantly more mature and developed than those of other MENA countries. Including these markets would have skewed the overall data and masked the specific dynamics of emerging markets within the region. By concentrating on developing and high-potential economies such as Saudi Arabia, UAE, Egypt, and Morocco, this report aims to provide actionable intelligence for investors, policymakers, and companies seeking to capitalize on the region's untapped renewable energy opportunities.

Report Includes

Analyses of trends in the Middle East and Northern Africa (MENA) markets for renewable energy, with revenue data for 2024, estimates for 2025 and projected CAGRs through 2030

Estimates of the market size and revenue prospects, along with a corresponding market share analysis by source, end-users, and country

An analysis of technological advancements in solar, wind and green hydrogen energy, government policies and regulatory frameworks, and industry investment trends

Analysis of the industry structure, including companies' product offerings, strategic alliances, venture fundings and investment outlook

Contents

CHAPTER 1 EXECUTIVE SUMMARY

Market Outlook
Scope of Report
Reasons for Doing This Study
Market Summary

CHAPTER 2 MENA RENEWABLE ENERGY INDUSTRY OUTLOOK

Introduction
Market Overview
Resource Availability
Government Policies and National Strategies
Global vs. MENA Renewable Energy Market Analysis
Market Size and Installed Capacity
Resource Availability
Technology Adoption and Diversification
Government Policies and Regulatory Environment
Investment Trends
Grid Infrastructure and Integration
Innovation and Emerging Technologies
Environmental and Socioeconomic Considerations
Market Outlook

CHAPTER 3 MARKET DYNAMICS

Market Dynamics
Market Drivers
Government-Led Visionary Strategies and Energy Diversification Plans
Abundant Natural Resources Offer Ideal Renewable Potential
Rising Energy Demand and Electrification of New Sectors
Energy Export Ambitions and the Rise of Green Hydrogen
Market Challenges
Overdependence on Fossil Fuel Subsidies
Limited Grid Infrastructure and Interconnectivity
Market Opportunities
Green Hydrogen and Ammonia Production for Export and Domestic Use

Industrial Decarbonization and Renewable-Powered Manufacturing
Development of Utility-Scale Renewable Energy Projects

CHAPTER 4 MARKET SEGMENTATION ANALYSIS

Segmentation Breakdown
Market Analysis by Source
Hydropower
Solar Energy
Wind Energy
Bioenergy
Other renewable sources
Market Analysis by End User
Residential Sector
Commercial Sector
Industrial Sector

CHAPTER 5 COUNTRY ANALYSIS

Middle East and North African Market Analysis by Country
Egypt
Morocco
United Arab Emirates (UAE)
Jordan
Tunisia
Saudi Arabia
Oman
Algeria
Kuwait
Rest of MENA

CHAPTER 6 COMPETITIVE LANDSCAPE

Overview
Emerging Trends and Market Impact
Competitive Landscape
Key Companies and Competitive Strategies
Outlook
Concluding Remarks from BCC

CHAPTER 7 APPENDIX

Methodology
Sources
Abbreviations

List Of Tables
