REPORT SCOPE:

The scope of the report includes, a general outlook of the sensor industry, with the scope limited to reports published by BCC Research during the year 2017 and 2018. This report covers only conventional sensors such as pressure, temperature, level, flow and position sensors, and excludes unconventional sensors such as pointing sensors used in touch screens and touch-pads, barcode readers and radio frequency identification (RFID) readers; remote readout and intelligent power meters; gas and water meters; and remote readout heat meters. Estimated values used are based on manufacturers' total revenues. Projected and forecasted revenue values are in constant U.S. dollars, unadjusted for inflation. The scope is limited to the recent studies published by BCC Research and is thus not exhaustive.

REPORT INCLUDES:

53 data tables

An overview of global outlook and sensors market analysis

Detailed description of conventional sensors such as pressure, temperature, level, flow and position sensors and description of their potential applications

Information on radar and radar sensors and description of their properties and advantages

Identification of segments with high growth potential and discussion of future prospects

+44 20 8123 2220
info@marketpublishers.com

Examination of key trends related to types, applications and regional factors that shape and influence the overall sensors industry

Insights into government initiatives for smart industrialization in developing economies

Profiles of major players in the industry including Ametek Inc., Delphi Corp., Hitachi Automotive Systems, Panasonic Electric Works and Philips Photonics
