## Abstracts

### Report Scope

The report provides an overview and analysis of the global SSB market and leading companies' products, strategies and initiatives. Using 2023 as the base year, the report provides estimated market data for 2024, and forecasts for 2024 through 2029. It also includes details about different types of SSBs and their end-use applications. Estimated market values are based on the determined market penetration of SSBs in the electric vehicle (EV) battery market. In the report, only the battery electric vehicle (BEV) industry has been considered, and not the plug-in hybrid electric vehicles (PHEVs), as SSB technology is being primarily developed as an advanced power source for BEVs. Projected revenue values are in constant U.S. dollars that have not been adjusted for inflation.

In this report, the global SSB market is segmented by:

Type: bulk and thin film batteries.

Cell type: single-cell and multi-cell batteries.

Rechargeability: primary and secondary batteries.

Capacity: below 20 milliampere-hours (mAh), 20–500 mAh, above 500 mAh.

End use industry: EVs, industrial, medical and healthcare, consumer electronics, and others. (Others include energy storage, aerospace and military).

-Region: North America, Europe, Asia-Pacific and the rest of the world (Rest of World).
