Abstracts

REPORT SCOPE:

This report will cover the sunscreen ingredient industry. Definitive and detailed estimates and forecasts of the global market are provided, followed by a detailed analysis of the regions, protection types, sunscreen types and applications.

This report covers the technological, economic and business considerations of the sunscreen ingredient industry, with analyses and forecasts provided for global markets. It also includes descriptions of market forces relevant to the sunscreen ingredient industry and their areas of application.

Global markets are presented for the size of sunscreen ingredient segments, along with growth forecasts through 2026. Estimates of sales value are based on the price in the supply chain. Market-driving forces and industry structure are examined. International aspects are analyzed for all global regions and sunscreen ingredient types. Profiles of major global manufacturers are presented.

This report considers the impact of COVID-19. In 2020, the growth rate of every global industry was impacted by the pandemic. The developing COVID-19 pandemic has currently halted the progress of every economy. In addition to taking measures to lock down their respective countries to contain the spread of the coronavirus, especially in affected cities, various governments are also taking the measures necessary to contain the economic slowdown.

The sunscreen ingredient market is further segmented based on its protection type: UVB, UVA I, UVB/UVA I and UVB/UVA I-II. The market is also segmented into applications, including sun care, skin care and hair care. It is further segmented into organic and inorganic sunscreen ingredient types.

REPORT INCLUDES:
