### REPORT SCOPE:

The scope of this report is broad and covers different types of synthetic and natural waxes, and their application in different areas. The market is broken down by types of synthetic and natural waxes, applications, and regions. Revenue forecasts from 2017 to 2022 are given for each major type of wax, application, and region. The estimated values are derived using a bottom-up approach and are based on manufacturers' total revenues. This report does not include market insights and forecasts for Paraffin waxes as the growth in demand for paraffins are stagnant worldwide. The report rather focuses on growth segments of synthetic and natural waxes that are slowly replacing paraffin in multiple industrial and consumer application across the globe.

Regions studied in the report include North America, Asia-Pacific, Europe, South America and the Middle East and Africa. The average price based on extensive primary and secondary research is used for the conversion of volume market to value market and vice-versa.

The report also includes a discussion of the major players across each of the regional markets for synthetic and natural waxes. It explains the major market drivers of the global synthetic and natural waxes industry, current trends within the industry, major applications, and the regional dynamics of the global synthetic and natural waxes market. The report concludes with a special focus on the vendor landscape and includes detailed profiles of the major vendors in the global synthetic and natural waxes industry.
