Abstracts

Summary:

This report provides a comprehensive analysis of Thermo Fisher Scientific Inc., covering key details such as key milestones/history, product offerings, technologies, major applications and end-user industries it serves.

Thermo Fisher Scientific Inc. is the successor to Thermo Electron Co., founded in 1956 in Waltham, Massachusetts, by George Hatsopoulos. Thermo Fisher was formed by merging Thermo Electron Co. and Fisher Scientific Co. in 2006. This life sciences company specializes in providing research and development tools and reagents. It serves multiple markets such as pharmaceutical and biotech, academic and government, industrial and applied, and healthcare and diagnostics.

Report Scope

This report provides a comprehensive analysis of Thermo Fisher Scientific, covering key details such as key milestones/history, product offerings, technologies, major applications and end-user industries it serves. It includes details of Thermo Fisher Scientific's ownership structure and key management. It also includes company's business segments and evaluates financial performance for 3 years. The strategic analysis chapter highlights recent developments, including mergers, acquisitions, partnerships, collaborations, product launches, and innovation initiatives. It further provides an analysis of R&D expenditure during the 2023-2025 period, discussing key focus areas and technological breakthroughs. Additionally, a list of distributors across regions was mapped and includes an in-depth SWOT analysis to evaluate the micro and macro environment on a company's growth trajectory.
