REPORT SCOPE:

The current report offers a detailed picture of the viscosupplementation market. Viscosupplementation is indicated for the treatment of knee, hip, shoulder and ankle osteoarthritis. Hyaluronic acid viscosupplement is injected into joints to reduce joint pains and treat osteoarthritis.

This report highlights the current and future market potential for viscosupplementation and provides a detailed analysis of the competitive environment, regulatory scenario, patent analysis, pipeline analysis, drivers, restraints, opportunities and trends in the market. The report also covers market projections through 2025, as well as market shares for key market players.

This report details market shares for viscosupplementation based on procedure type, application and geography. Based on procedure type, the market is segmented into Three-Injection cycle, Single-Injection cycle and Five-Injection cycle procedure segments. Based on application, the market is segmented into knee osteoarthritis, hip osteoarthritis and the others segment.

By geography, the market has been segmented into North America, Europe, Asia-Pacific, Latin America and the Middle East and Africa. Detailed analyses of major countries (the U.S., Canada, Germany, the UK, France, Spain, Italy, Japan, China and India) are covered in regional segments. For market estimates, data has been provided for the year 2018 as the base year, with forecasts for 2019 Through 2025. Estimated values are based on viscosupplement manufacturers total revenues. Projected and forecasted revenue values are in constant U.S. dollars, unadjusted for inflation.

REPORT INCLUDES:

39 tables

An overview of global viscosupplementation market

Detailed market share of viscosupplementation based on product type, procedure type, injection cycle, and application

Highlights of current and future market potential of viscosupplementation and a detailed analysis of the competitive environment, regulatory scenario, patent analysis, and drivers, challenges, and trends in market growth

Knowledge about hyaluronic acid, a lubricating agent and discussion on how it enables smooth movement of bones
