## Abstracts

On the basis of thorough research of the local industry, including international and local connector manufacturers, Bishop & Associates has recently published a new research report on the Indian Connector Market. The report illustrates clearly which industries are beginning to develop and how the connector industry in India differs from other regions in the world in terms of end—use equipment and overall product mix.

Based on the researched data Bishop & Associates developed three possible growth scenarios for the Indian Connector Market. The Indian connector market may well reach a five-year compound average growth rate between 2009 and 2014 of 14.5 to 23.4 percent depending on the growth scenario that will develop. Whatever the outcome, the Indian connector market will be worth at least well over US\$1.1 billion by 2014 and that alone justifies a closer look at the Indian Connector Market.

This report provides a comprehensive analysis of the Indian Connector Market detailing connector consumption by market sector, with details by end-use equipment sector and connector product type. The report covers sales to market data for the years 2009, 2010, and a 2014 forecast.

In addition the report provides detailed company profiles for over 40 Indian connector companies, an insight in the manufacturing footprint in India of leading international connector manufacturers and their estimated revenues in the Indian Connector Market.
