Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk by
about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to recover
and partially adapted to pandemic restrictions. The research and development of vaccines has
made breakthrough progress, and many governments have also issued various policies to
stimulate economic recovery, particularly in the United States, is likely to provide a

strong boost
to economic activity but prospects for sustainable growth vary widely between countries and
sectors. Although the global economy is recovering from the great depression caused by
COVID-19, it will remain below pre-pandemic trends for a prolonged period. The pandemic has
exacerbated the risks associated with the decade-long wave of global debt accumulation. It is
also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic
environment, we published the Global AI in Auto Insurance Market Status, Trends and COVID-19
