Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk

by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

recover and partially adapted to pandemic restrictions. The research and development of

vaccines has made breakthrough progress, and many governments have also issued various

policies to stimulate economic recovery, particularly in the United States, is likely to provide a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged period. The pandemic has exacerbated the risks associated with the decade-long wave of global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.
