the global economic growth in 2021 and 2022. The World Bank predicts that the global economic output is expected to expand 4 percent in 2021 while 3.8 percent in 2022. According to our research on Artificial Intelligence In Diagnostic market and global economic environment, we forecast that the global market size of Artificial Intelligence In
Diagnostic will reach xx million $ in 2027 with a CAGR of % from 2022-2027.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk
by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged period. The pandemic has exacerbated the risks associated with the decade-long wave of global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic environment, we published the Global Artificial Intelligence In Diagnostic Market Status, Trends and COVID-19 Impact Report 2022, which provides a comprehensive analysis of the global Artificial Intelligence In Diagnostic market , This Report covers the manufacturer data, including: sales volume, price, revenue, gross margin, business distribution etc., these data help the consumer know about the competitors better.
