percent in 2021 while 3.8 percent in 2022. According to our research on Aviation IoT market and global economic environment, we forecast that the global market size of Aviation IoT will reach xx million \$ in 2027 with a CAGR of % from 2022-2027.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk

by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

The world has entered the COVID-19 epidemic recovery period. In this complex economic environment, we published the Global Aviation IoT Market Status, Trends and COVID-19 Impact Report 2022, which provides a comprehensive analysis of the global Aviation IoT market , This Report covers the manufacturer data, including: sales volume, price, revenue, gross margin, business distribution etc., these data help the consumer know about the competitors better.
