Although the global economy is recovering from the great depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged period. The pandemic has exacerbated the risks associated with the decade-long wave of global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic environment, we published the Global Biological and Chemical Wastewater Treatment Market Status, Trends and COVID-19 Impact Report 2022, which provides a comprehensive analysis of the global Biological and Chemical Wastewater Treatment market.
