At the beginning of 2020, COVID-19 disease began to spread around the world, millions of people worldwide were infected with COVID-19 disease, and major countries around the world have implemented foot prohibitions and work stoppage orders. Except for the medical supplies and life support products industries, most industries have been greatly impacted, and Building Information Modeling (BIM) industries have also been greatly affected.

In the past few years, the Building Information Modeling (BIM) market experienced a growth of 0.0963643807126, the global market size of Building Information Modeling (BIM) reached 3580.0 million \$ in 2020, of what is about 2260.0 million \$ in 2015.

From 2015 to 2019, the growth rate of global Building Information Modeling (BIM) market size was in the range of xxx%. At the end of 2019, COVID-19 began to erupt in China, Due to the huge decrease of global economy; we forecast the growth rate of global economy will show a decrease of about 4%, due to this reason, Building Information Modeling (BIM) market size in 2020 will be 3580.0 with a growth rate of xxx%. This is xxx percentage points lower than in previous years.

As of the date of the report, there have been more than 20 million confirmed cases of CVOID-19 worldwide, and the epidemic has not been effectively controlled. Therefore, we predict that the global epidemic will be basically controlled by the end of 2020 and the global Building Information Modeling (BIM) market size will reach 7640.0 million \$ in 2025, with a CAGR of xxx% between 2020-2025.
