Abstracts

In the past few years, the Cluster Computing market experienced a huge change under the
influence of COVID-19, the global market size of Cluster Computing reached (2021 Market
size XXXX) million $ in 2021 from (2016 Market size XXXX) in 2016 with a CAGR of 15 from
2016-2021 is. As of now, the global COVID-19 Coronavirus Cases have exceeded 200
million, and the global epidemic has been basically under control, therefore, the World Bank
has estimated the global economic growth in 2021 and 2022. The World Bank predicts that
the global economic output is expected to expand 4 percent in 2021 while 3.8 percent in
2022. According to our research on Cluster Computing market and global economic
environment, we forecast that the global market size of Cluster Computing will reach (2026
Market size XXXX) million $ in 2026 with a CAGR of % from 2021-2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk
by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to
recover and partially adapted to pandemic restrictions. The research and development of
vaccines has made breakthrough progress, and many governments have also issued various
policies to stimulate economic recovery, particularly in the United States, is likely to

provide
a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great
depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged
period. The pandemic has exacerbated the risks associated with the decade-long wave of
global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic
environment, we published the Global Cluster Computing Market Status, Trends and COVID-
19 Impact Report 2021, which provides a comprehensive analysis of the global Cluster Computing market , This Report covers the manufacturer data, including: sales volume, price, revenue, gross margin, business distribution etc., these data help the consumer know
about the competitors better. This report also covers all the regions and countries of the world, which shows the regional development status, including market size, volume and value, as well as price data. Besides, the report also covers segment data, including: type
