Abstracts

In the past few years, the Cognitive Computing Technology market experienced a huge change under the influence of COVID-19, the global market size of Cognitive Computing
Technology reached (2021 Market size XXXX) million $ in 2021 from (2016 Market size XXXX) in 2016 with a CAGR of 15 from 2016-2021 is. As of now, the global COVID-19 Coronavirus Cases have exceeded 200 million, and the global epidemic has been basically
under control, therefore, the World Bank has estimated the global economic growth in 2021
and 2022. The World Bank predicts that the global economic output is expected to expand 4
percent in 2021 while 3.8 percent in 2022. According to our research on Cognitive Computing Technology market and global economic environment, we forecast that the global market size of Cognitive Computing Technology will reach (2026 Market size XXXX)
million $ in 2026 with a CAGR of % from 2021-2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk
by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to
recover and partially adapted to pandemic restrictions. The research and development of
vaccines has made breakthrough progress, and many governments have also issued various
policies to stimulate economic recovery, particularly in the United States, is likely to

provide
a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great
depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged
period. The pandemic has exacerbated the risks associated with the decade-long wave of
global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic
environment, we published the Global Cognitive Computing Technology Market Status, Trends and COVID-19 Impact Report 2021, which provides a comprehensive analysis of the
global Cognitive Computing Technology market , This Report covers the manufacturer data,
including: sales volume, price, revenue, gross margin, business distribution etc., these data
help the consumer know about the competitors better. This report also covers all the regions and countries of the world, which shows the regional development status, including
market size, volume and value, as well as price data. Besides, the report also covers segment
data, including: type wise, industry wise, channel wise etc. all the data period is from 2015-
2021E, this report also provide forecast data from 2021-2026.
