Abstracts

In the past few years, the Dry Etching Machine for Compound Semiconductor market experienced a huge change under the influence of COVID-19, the global market size of Dry
Etching Machine for Compound Semiconductor reached million $ in 2021 from in 2016 with a
CAGR of xxx from 2016-2021 is. As of now, the global COVID-19 Coronavirus Cases have
exceeded 200 million, and the global epidemic has been basically under control, therefore, the
World Bank has estimated the global economic growth in 2021 and 2022. The World Bank
predicts that the global economic output is expected to expand 4 percent in 2021 while 3.8
percent in 2022. According to our research on Dry Etching Machine for Compound Semiconductor market and global economic environment, we forecast that the global market
size of Dry Etching Machine for Compound Semiconductor will reach million $ in 2026 with a
CAGR of % from 2021-2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk by
about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to recover
and partially adapted to pandemic restrictions. The research and development of vaccines has

made breakthrough progress, and many governments have also issued various policies to
stimulate economic recovery, particularly in the United States, is likely to provide a strong boost
to economic activity but prospects for sustainable growth vary widely between countries and
sectors. Although the global economy is recovering from the great depression caused by
COVID-19, it will remain below pre-pandemic trends for a prolonged period. The pandemic has
exacerbated the risks associated with the decade-long wave of global debt accumulation. It is
also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic
environment, we published the Global Dry Etching Machine for Compound Semiconductor
Market Status, Trends and COVID-19 Impact Report 2021, which provides a comprehensive
analysis of the global Dry Etching Machine for Compound Semiconductor market , This Report
