Abstracts

In the past few years, the Fluorescence In Situ Hybridization (FISH) Imaging Systems market experienced a huge change under the influence of COVID-19, the global market size
of Fluorescence In Situ Hybridization (FISH) Imaging Systems reached xx million $ in 2021
from xx in 2016 with a CAGR of xx from 2016-2021 is. As of now, the global COVID-19 Coronavirus Cases have exceeded 200 million, and the global epidemic has been basically
under control, therefore, the World Bank has estimated the global economic growth in 2021
and 2022. The World Bank predicts that the global economic output is expected to expand 4
percent in 2021 while 3.8 percent in 2022. According to our research on Fluorescence In
Situ Hybridization (FISH) Imaging Systems market and global economic environment, we
forecast that the global market size of Fluorescence In Situ Hybridization (FISH) Imaging
Systems will reach (2026 Market size XXXX) million $ in 2026 with a CAGR of % from 2021-
2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk
by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

recover and partially adapted to pandemic restrictions. The research and development of
vaccines has made breakthrough progress, and many governments have also issued various
policies to stimulate economic recovery, particularly in the United States, is likely to provide
a strong boost to economic activity but prospects for sustainable growth vary widely
between countries and sectors. Although the global economy is recovering from the great
depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged
period. The pandemic has exacerbated the risks associated with the decade-long wave of
global debt accumulation. It is also likely to steepen the long-expected slowdown in
potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic
environment, we published the Global Fluorescence In Situ Hybridization (FISH) Imaging
Systems Market Status, Trends and COVID-19 Impact Report 2021, which provides a
