vaccines has made breakthrough progress, and many governments have also issued various
policies to stimulate economic recovery, particularly in the United States, is likely to provide
a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great
depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged
period. The pandemic has exacerbated the risks associated with the decade-long wave of
global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic
