Abstracts

In the past few years, the Machine Vision Technology market experienced a huge change
under the influence of COVID-19, the global market size of Machine Vision Technology reached (2021 Market size XXXX) million $ in 2021 from (2016 Market size XXXX) in 2016 with a CAGR of xxx from 2016-2021 is. As of now, the global COVID-19 Coronavirus Cases have exceeded 200 million, and the global epidemic has been basically
under control, therefore, the World Bank has estimated the global economic growth in 2021
and 2022. The World Bank predicts that the global economic output is expected to expand 4
percent in 2021 while 3.8 percent in 2022. According to our research on Machine Vision Technology market and global economic environment, we forecast that the global market
size of Machine Vision Technology will reach (2026 Market size XXXX) million $ in 2026 with a CAGR of % from 2021-2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk
by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great
depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged
period. The pandemic has exacerbated the risks associated with the decade-long wave of
global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic
environment, we published the Global Machine Vision Technology Market Status, Trends
and COVID-19 Impact Report 2021, which provides a comprehensive analysis of the global
Machine Vision Technology market , This Report covers the manufacturer data, including:
sales volume, price, revenue, gross margin, business distribution etc., these data help the
