At the beginning of 2020, COVID-19 disease began to spread around the world, millions of people

worldwide were infected with COVID-19 disease, and major countries around the world have

implemented foot prohibitions and work stoppage orders. Except for the medical supplies and

life support products industries, most industries have been greatly impacted, and Nanosatellite

and Microsatellite industries have also been greatly affected.

In the past few years, the Nanosatellite and Microsatellite market experienced a growth of

#VALUE!, the global market size of Nanosatellite and Microsatellite reached 784 million \$ in

2020, of what is about XX million \$ in 2015.

From 2015 to 2019, the growth rate of global Nanosatellite and Microsatellite market size was in

the range of xxx%. At the end of 2019, COVID-19 began to erupt in China, Due to the huge

decrease of global economy; we forecast the growth rate of global economy will show a decrease of about 4%, due to this reason, Nanosatellite and Microsatellite market size in 2020

will be 784 with a growth rate of xxx%. This is xxx percentage points lower than in previous years.

As of the date of the report, there have been more than 20 million confirmed cases of CVOID-19

worldwide, and the epidemic has not been effectively controlled. Therefore, we predict that the

global epidemic will be basically controlled by the end of 2020 and the global Nanosatellite and

Microsatellite market size will reach 1624 million \$ in 2025, with a CAGR of xxx% between

2020-2025.
