the global economic growth in 2021 and 2022. The World Bank predicts that the global economic output is expected to expand 4 percent in 2021 while 3.8 percent in 2022.

According to our research on Premature Rupture of Membranes (PROM) Testing market

and global economic environment, we forecast that the global market size of Premature Rupture of Membranes (PROM) Testing will reach (2026 Market size XXXX) million \$ in 2026 with a CAGR of % from 2021-2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk

by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

Although the global economy is recovering from the great depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged period. The pandemic has exacerbated the risks associated with the decade-long wave of global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic environment, we published the Global Premature Rupture of Membranes (PROM) Testing Market Status, Trends and COVID-19 Impact Report 2021, which provides a comprehensive analysis of the global Premature Rupture of Membranes (PROM) Testing market.
