Abstracts

In the past few years, the Robotic Process Automation Product market experienced a huge

change under the influence of COVID-19, the global market size of Robotic Process Automation Product reached (2021 Market size XXXX) million \$ in 2021 from (2016 Market

size XXXX) in 2016 with a CAGR of 15 from 2016-2021 is. As of now, the global COVID-19

Coronavirus Cases have exceeded 200 million, and the global epidemic has been basically

under control, therefore, the World Bank has estimated the global economic growth in 2021

and 2022. The World Bank predicts that the global economic output is expected to expand 4

percent in 2021 while 3.8 percent in 2022. According to our research on Robotic Process

Automation Product market and global economic environment, we forecast that the global

market size of Robotic Process Automation Product will reach (2026 Market size XXXX) million \$ in 2026 with a CAGR of % from 2021-2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk

by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

recover and partially adapted to pandemic restrictions. The research and development of

vaccines has made breakthrough progress, and many governments have also issued various

policies to stimulate economic recovery, particularly in the United States, is likely to provide

a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great

depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged

period. The pandemic has exacerbated the risks associated with the decade-long wave of

global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic

environment, we published the Global Robotic Process Automation Product Market Status,

Trends and COVID-19 Impact Report 2021, which provides a comprehensive analysis of the
