In the past few years, the Small Hydropower market experienced a huge change under the

influence of COVID-19 and Russia-Ukraine War, the global market size of Small Hydropower

reached (2022 Market size XXXX) million \$ in 2022 from (2017 Market size XXXX) in 2017

with a CAGR of xx from 2017-2022. Facing the complicated international situation, the future of the Small Hydropower market is full of uncertain. BisReport predicts that the global Small Hydropower market size will reach (2028 Market size XXXX) million \$in 2028

with a CAGR of xx% from 2022-2028.

Since the outbreak of COVID-19, the world economy continues to suffer from a series of destabilizing shocks, many companies experienced bankruptcy and a sharp decline in turnover. After more than two years of pandemic, global economy began to recover, entering 2022, the Russian Federation's invasion of Ukraine and its global effects on commodity markets, supply chains, inflation, and financial conditions have steepened the

slowdown in global growth. In particular, the war in Ukraine is leading to soaring prices and

volatility in energy markets, with improvements in activity in energy exporters more than offset by headwinds to activity in most other economies. The invasion of Ukraine has also

led to a significant increase in agricultural commodity prices, which is exacerbating food insecurity and extreme poverty in many emerging market and developing economies.

Numerous risks could further derail what is now a precarious recovery. Among them is, in

particular, the possibility of stubbornly high global inflation accompanied by tepid growth,

reminiscent of the stagflation of the 1970s. This could eventually result in a sharp tightening of monetary policy in advanced economies to rein in inflation, lead to surging borrowing costs, and possibly culminate in financial stress in some emerging market and

developing economies. A forceful and wide-ranging policy response is required by policy

makers in these economies and the global community to boost growth, bolster macroeconomic frameworks, reduce financial vulnerabilities, provide support to vulnerable

population groups, and attenuate the long-term impacts of the global shocks of recent years.

In this complex international situation, BisReport published Global Small Hydropower Market Status, Trends and COVID-19 Impact Report 2022, which provides a comprehensive
