In the past few years, the Social Trading market experienced a huge change under the influence

of COVID-19, the global market size of Social Trading reached xxx million \$ in 2021 from xxx in

2016 with a CAGR of xxx from 2016-2021 is. As of now, the global COVID-19 Coronavirus Cases

have exceeded 200 million, and the global epidemic has been basically under control, therefore,

the World Bank has estimated the global economic growth in 2021 and 2022. The World Bank

predicts that the global economic output is expected to expand 4 percent in 2021while 3.8

percent in 2022. According to our research on Social Trading market and global economic

environment, we forecast that the global market size of Social Trading will reach xxx million \$ in

2026 with a CAGR of % from 2021-2026.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk by

about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to recover

and partially adapted to pandemic restrictions. The research and development of vaccines has

made breakthrough progress, and many governments have also issued various policies to

stimulate economic recovery, particularly in the United States, is likely to provide a strong boost

to economic activity but prospects for sustainable growth vary widely between countries and

sectors. Although the global economy is recovering from the great depression caused by

COVID-19, it will remain below pre-pandemic trends for a prolonged period. The pandemic has

exacerbated the risks associated with the decade-long wave of global debt accumulation. It is

also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic

environment, we published the Global Social Trading Market Status, Trends and COVID-19

Impact Report 2021, which provides a comprehensive analysis of the global Social Trading
