Abstracts

In the past few years, the Sputtering Targets and Evaporation Materials market experienced

a huge change under the influence of COVID-19, the global market size of Sputtering Targets

and Evaporation Materials reached xx million \$ in 2021 from xx in 2016 with a CAGR of xx

from 2016-2021 is. As of now, the global COVID-19 Coronavirus Cases have exceeded 500

million, and the global epidemic has been basically under control, therefore, the World Bank

has estimated the global economic growth in 2021 and 2022. The World Bank predicts that

the global economic output is expected to expand 4 percent in 2021 while 3.8 percent in 2022. According to our research on Sputtering Targets and Evaporation Materials market

and global economic environment, we forecast that the global market size of Sputtering Targets and Evaporation Materials will reach xx million \$ in 2027 with a CAGR of % from

2022-2027.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk

by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

recover and partially adapted to pandemic restrictions. The research and development of

vaccines has made breakthrough progress, and many governments have also issued various

policies to stimulate economic recovery, particularly in the United States, is likely to provide

a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great

depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged

period. The pandemic has exacerbated the risks associated with the decade-long wave of

global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic

environment, we published the Global Sputtering Targets and Evaporation Materials Market

Status, Trends and COVID-19 Impact Report 2022, which provides a comprehensive analysis of the global Sputtering Targets and Evaporation Materials market, This Report
