In the past few years, the Thermal Treatment Air Filtration market experienced a huge change under the influence of COVID-19, the global market size of Thermal Treatment Air

Filtration reached 1084.7 million \$ in 2021 from xx in 2016 with a CAGR of xx from 2016-

2021 is. As of now, the global COVID-19 Coronavirus Cases have exceeded 500 million, and

the global epidemic has been basically under control, therefore, the World Bank has estimated the global economic growth in 2021 and 2022. The World Bank predicts that the

global economic output is expected to expand 4 percent in 2021 while 3.8 percent in 2022.

According to our research on Thermal Treatment Air Filtration market and global economic

environment, we forecast that the global market size of Thermal Treatment Air Filtration will reach 1342.0 million \$ in 2027 with a CAGR of % from 2022-2027.

Due to the COVID-19 pandemic, according to World Bank statistics, global GDP has shrunk

by about 3.5% in 2020. Entering 2021, Economic activity in many countries has started to

recover and partially adapted to pandemic restrictions. The research and development of

vaccines has made breakthrough progress, and many governments have also issued various

policies to stimulate economic recovery, particularly in the United States, is likely to

provide

a strong boost to economic activity but prospects for sustainable growth vary widely between countries and sectors. Although the global economy is recovering from the great

depression caused by COVID-19, it will remain below pre-pandemic trends for a prolonged

period. The pandemic has exacerbated the risks associated with the decade-long wave of

global debt accumulation. It is also likely to steepen the long-expected slowdown in potential growth over the next decade.

The world has entered the COVID-19 epidemic recovery period. In this complex economic

environment, we published the Global Thermal Treatment Air Filtration Market Status, Trends and COVID-19 Impact Report 2022, which provides a comprehensive analysis of the
