Abstracts

In the past few years, the Vitamin C (Ascorbic Acid) market experienced a huge change under the influence of COVID-19 and Russia-Ukraine War, the global market size of Vitamin C (Ascorbic Acid) reached 1130.0 million \$ in 2022 from 940.0 in 2017 with a CAGR of 0.0375048079581 from 2017-2022. Facing the complicated international situation, the future of the Vitamin C (Ascorbic Acid) market is full of uncertain. BisReport predicts that the global Vitamin C (Ascorbic Acid) market size will reach 1430.0 million \$ in 2028 with a CAGR of xx% from 2022-2028.

Since the outbreak of COVID-19, the world economy continues to suffer from a series of destabilizing shocks, many companies experienced bankruptcy and a sharp decline in turnover. After more than two years of pandemic, global economy began to recover, entering 2022, the Russian Federation's invasion of Ukraine and its global effects on commodity markets, supply chains, inflation, and financial conditions have steepened the slowdown in global growth. In particular, the war in Ukraine is leading to soaring prices and volatility in energy markets, with improvements in activity in energy exporters more than offset by headwinds to activity in most other economies. The invasion of Ukraine has also led to a significant increase in agricultural commodity prices, which is exacerbating food insecurity and extreme poverty in many emerging market and developing economies.

Numerous risks could further derail what is now a precarious recovery. Among them is, in particular, the possibility of stubbornly high global inflation accompanied by tepid growth, reminiscent of the stagflation of the 1970s. This could eventually result in a sharp tightening of monetary policy in advanced economies to rein in inflation, lead to surging borrowing costs, and possibly culminate in financial stress in some emerging market and developing economies. A forceful and wide-ranging policy response is

required by policy makers in these economies and the global community to boost growth, bolster macroeconomic frameworks, reduce financial vulnerabilities, provide support to vulnerable population groups, and attenuate the long-term impacts of the global shocks of recent years.

In this complex international situation, BisReport published Global Vitamin C (Ascorbic Acid) Market Status, Trends and COVID-19 Impact Report 2022, which provides a comprehensive analysis of the global Vitamin C (Ascorbic Acid) market.
