This report will be delivered in 7-10 working days. Introduction to Asia-Pacific Hydrogen Storage and Transportation Market

The Asia-Pacific hydrogen storage and transportation market, valued at \$436.1 million in 2023, is expected to reach \$2,556.1 million by 2033, exhibiting a robust CAGR of 19.34% during the forecast period 2023-2033. The market for hydrogen storage and transportation in Asia Pacific is being driven by the pressing need for decarbonization, which positions hydrogen as a crucial renewable energy source for a variety of industries. The safety, effectiveness, and affordability of hydrogen systems are being improved by technological developments, which is encouraging wider implementation throughout the area.

Growing investments in renewable energy for the production of green hydrogen, together with encouraging government regulations and aggressive clean energy targets in nations like Australia, China, South Korea, and Japan, are driving market expansion. The increasing use of fuel cell automobiles and growing industrial applications in industries like steel, chemicals, and power generation are driving the development of hydrogen infrastructure, including fuelling stations.

The growing demand for reliable and scalable hydrogen storage and transportation solutions underscores APAC's commitment to a sustainable, low-carbon future. These advancements are crucial to achieving energy transition targets and fostering economic

growth through clean energy innovation.

## Market Introduction

The market for hydrogen storage and transportation in Asia-Pacific is expanding quickly due to the region's strong emphasis on decarbonization objectives and clean energy transitions. Known as a vital renewable energy source, hydrogen is becoming more and more popular in sectors like manufacturing, power generation, and transportation. With the help of government regulations, investments in the production of green hydrogen, and extensive renewable energy projects, nations like China, South Korea, Japan, and Australia are spearheading the movement.

Safety, effectiveness, and affordability are being enhanced by technological developments in hydrogen storage, such as liquid hydrogen, compressed gas, and solid-state solutions like metal hydrides. Adoption is also being accelerated by the growth of hydrogen infrastructure, such as transportation networks and fueling stations, especially for industrial and fuel cell applications.

As APAC keeps energy security and carbon reduction as top priorities, the demand for reliable hydrogen storage and transportation systems will grow significantly, playing a pivotal role in achieving a sustainable and low-carbon future.

## Market Segmentation

### Segmentation 1: by Application

Compressed Hydrogen

Liquid Hydrogen

Others

### Segmentation 2: by Product

Storage

Distribution

## Segmentation 3: by Region

Asia-Pacific - China, Japan, South Korea, India, and Rest-of-Asia-Pacific

How can this report add value to an organization?

**Product/Innovation Strategy:** The product segment helps the reader understand the different application and product segments of hydrogen storage and transportation and their potential in APAC region. Moreover, the study gives the reader a detailed understanding of the end-use industries and different products offered with different regulations, consortiums and associations, and government programs impacting the hydrogen storage and transportation manufacturers for various purposes.

**Growth/Marketing Strategy:** The APAC hydrogen storage and transportation market has seen major development by key players operating in the market, such as business expansion, partnership, collaboration, and joint venture. The favored strategy for the companies has been partnership, collaboration, and joint venture activities to strengthen their position in the APAC hydrogen storage and transportation market.

**Competitive Strategy:** Key players in the APAC hydrogen storage and transportation market analyzed and profiled in the study involve hydrogen storage and transportation manufacturers, including market segments covered by distinct product kinds, applications served, and regional presence, as well as the influence of important market tactics employed. Moreover, a detailed competitive benchmarking of the players operating in the APAC hydrogen storage and transportation market has been done to help the reader understand how players stack against each other, presenting a clear market landscape. Additionally, comprehensive competitive strategies such as partnerships, agreements, and collaborations will aid the reader in understanding the untapped revenue pockets in the market.

## Key Market Players and Competition Synopsis

The companies that are profiled have been selected based on thorough secondary research, which includes analyzing company coverage, product portfolio, market penetration, and insights gathered from primary experts.

Some prominent names established in the market are:

CIMC Enric Holdings Limited

INOX India Limited

## Contents

Executive Summary  
Scope and Definition

### 1 MARKETS

- 1.1 Trends: Current and Future Impact Assessment
  - 1.1.1 Trends Shaping Hydrogen Storage and Transportation Market
  - 1.1.2 Technological Advancements for More Efficient and Safe Hydrogen Storage
  - 1.1.3 Surge in Infrastructural Development
- 1.2 Supply Chain Overview
  - 1.2.1 Value Chain Analysis
- 1.3 Research and Development Review
  - 1.3.1 Patent Filing Trend (by Country and Company)
- 1.4 Regulatory Landscape
- 1.5 Market Dynamics Overview
  - 1.5.1 Market Drivers
    - 1.5.1.1 Decarbonization and Climate Change Initiatives
    - 1.5.1.2 Technological Advancements and Cost Reduction
  - 1.5.2 Market Restraints
    - 1.5.2.1 Safety Concerns Regarding High Flammability of Hydrogen
    - 1.5.2.2 Low Hydrogen Adoption Rate Compared to Other Energy Types
  - 1.5.3 Market Opportunities
    - 1.5.3.1 Rising Investments in Hydrogen Fueling Stations
    - 1.5.3.2 Renewable Energy Integration

### 2 REGIONS

- 2.1 Regional Summary
- 2.2 Asia-Pacific
  - 2.2.1 Key Market Participants in Asia-Pacific
  - 2.2.2 Regional Overview
  - 2.2.3 Driving Factors for Market Growth
  - 2.2.4 Factors Challenging the Market
  - 2.2.5 Application
  - 2.2.6 Product
  - 2.2.7 China
  - 2.2.8 South Korea

2.2.9 Japan

2.2.10 India

2.2.11 Rest-of-Asia-Pacific

### **3 MARKETS - COMPETITIVE BENCHMARKING & COMPANY PROFILES**

3.1 Competitive Landscape

3.2 Next Frontiers

3.3 Company Profiles

3.3.1 CIMC Enric Holdings Limited

3.3.1.1 Overview

3.3.1.2 Top Products/Product Portfolio

3.3.1.3 Top Competitors

3.3.1.4 Target Customers

3.3.1.5 Key Personnel

3.3.1.6 Analyst View

3.3.1.7 Market Share, 2022

3.3.2 INOX India Limited

3.3.2.1 Overview

3.3.2.2 Top Products/Product Portfolio

3.3.2.3 Top Competitors

3.3.2.4 Target Customers

3.3.2.5 Key Personnel

3.3.2.6 Analyst View

3.3.2.7 Market Share, 2022

### **4 RESEARCH METHODOLOGY**

4.1 Data Sources

4.1.1 Primary Data Sources

4.1.2 Secondary Data Sources

4.1.3 Data Triangulation

4.2 Market Estimation and Forecast

## List Of Figures

### LIST OF FIGURES

Figure 1: Hydrogen Storage and Transportation Market (by Region), \$Million, 2022, 2026, and 2033

Figure 2: Pricing Analysis for Hydrogen Storage and Transportation Market (by Global and Region), \$ per Unit, 2022, 2026, and 2033

Figure 3: Asia-Pacific Hydrogen Storage and Transportation Market (by Application), \$Million, 2022, 2026, and 2033

Figure 4: Asia-Pacific Hydrogen Storage and Transportation Market (by Product), \$Million, 2022, 2026, and 2033

Figure 5: Key Events

Figure 6: Investment Needed to Develop Announced Projects Covering the Hydrogen Value Chain through 2030 (\$Billion)
