This report will be delivered in 7-10 working days. Global Chronic Refractory Gout Market, Analysis and Forecast: 2025-2035

Chronic refractory gout (CRG) is a severe form of gout, a type of arthritis caused by the accumulation of uric acid crystals in the joints. Unlike typical gout, where symptoms respond to standard treatments like NSAIDs or uric acid-lowering drugs, chronic refractory gout is characterized by persistent symptoms that do not improve with conventional therapies. This form of gout often leads to ongoing inflammation, intense pain, and the development of tophi—large deposits of uric acid crystals that form under the skin and around joints.

The condition is challenging to manage, particularly when factors such as non-compliance, inadequate drug response, or co-existing conditions like kidney disease or obesity contribute to its persistence. Treatments for chronic refractory gout include biologic therapies such as pegloticase (Krystexxa), which helps lower uric acid levels in the blood, and other emerging drugs aimed at reducing flare-ups and improving quality of life. While the condition can cause significant joint damage if left untreated, the advent of new treatments offers hope for better management and symptom control in affected individuals.

One of the key drivers of the chronic refractory gout market is the rising prevalence of gout and associated risk factors. As the global population ages and lifestyle-related

conditions such as obesity, hypertension, and metabolic syndrome become more prevalent, the incidence of gout, including its chronic and refractory forms, has been increasing. This growing patient population creates a significant demand for more effective treatments. Additionally, the limitations of existing therapies in managing refractory cases, which do not respond to traditional uric acid-lowering medications, have spurred the development of advanced biologics and other novel therapeutic options. This, in turn, drives market growth as patients seek better management options to control symptoms and prevent long-term joint damage.

Despite the growth of the chronic refractory gout market, several challenges persist that can hinder its full potential. One major challenge is the high cost of biologic therapies like pegloticase (Krystexxa), which are essential for treating severe, refractory cases of gout. These treatments can be prohibitively expensive, limiting access for many patients, especially in lower-income regions or for those without comprehensive insurance coverage. Another challenge is patient adherence to long-term treatment regimens. Many gout medications, particularly biologics, are administered via injections, which may lead to non-compliance due to side effects, administration complexity, or a lack of patient education.

Additionally, the lack of awareness and education about gout management among both patients and healthcare providers can contribute to misdiagnosis or delayed treatment, further complicating the management of refractory gout. Furthermore, co-morbid conditions such as kidney disease, which often accompany gout, complicate treatment plans and create additional barriers to achieving effective control of the disease. Addressing these challenges is essential for improving patient outcomes and ensuring broader access to emerging therapies in the chronic refractory gout market.

The global chronic refractory gout market is highly competitive, with several major companies actively involved, including Amgen Inc., Cartesian Therapeutics Inc., ArthroSi Therapeutics Inc., and Shanton Pharma Holdings Limited. These companies are at the forefront of developing and commercializing therapies aimed at addressing the unmet needs in managing chronic refractory gout, with a focus on innovative biologics, novel drug formulations, and targeted treatments to improve patient outcomes in this challenging condition.

The global chronic refractory gout market is experiencing several key emerging trends. One significant trend is the increased focus on biologic therapies. Biologics like pegloticase (Krystexxa) are gaining traction due to their targeted mechanism of action and ability to effectively treat severe, treatment-resistant cases of gout. These

therapies, which include monoclonal antibodies and enzyme inhibitors, are becoming the cornerstone of chronic refractory gout treatment, offering substantial improvements in reducing uric acid levels, alleviating tophi, and preventing joint damage. As the demand for more effective treatments grows, biologics are expected to dominate the market, driving further innovation and research into next-generation biologic therapies.

Executive Summary
Scope and Definition
Market/Product Definition
Inclusion and Exclusion
Key Questions Answered
Analysis and Forecast Note

1. MARKETS: INDUSTRY OUTLOOK

1.1 Introduction
1.2 Market Trends
1.3 Regulatory Framework
1.4 Epidemiology Analysis
1.5 Clinical Trial Analysis
1.6 Market Dynamics
 1.6.1 Impact Analysis
 1.6.2 Market Drivers
 1.6.3 Market Challenges
 1.6.4 Market Opportunities

2. GLOBAL CHRONIC REFRACTORY GOUT MARKET (REGION), (\$MILLION), 2023-2035

2.1 North America
 2.1.1 Key Findings
 2.1.2 Market Dynamics
 2.1.3 Market Sizing and Forecast
 2.1.3.1 North America Chronic Refractory Gout Market, by Country
 2.1.3.1.1 U.S.
 2.1.3.1.2 Canada
2.2 Europe
 2.2.1 Key Findings
 2.2.2 Market Dynamics
 2.2.3 Market Sizing and Forecast
 2.2.3.1 Europe Chronic Refractory Gout Market, by Country
 2.2.3.1.1 Germany
 2.2.3.1.2 U.K.

2.2.3.1.3 France

2.2.3.1.4 Italy

2.3 Asia Pacific

2.3.1 Key Findings

2.3.2 Market Dynamics

2.3.3 Market Sizing and Forecast

2.3.3.1 Asia Pacific Chronic Refractory Gout Market, by Country

2.3.3.1.1 Japan

3. GLOBAL CHRONIC REFRACTORY GOUT MARKET: COMPETITIVE LANDSCAPE AND COMPANY PROFILES

3.1 Key Strategies and Development

3.1.1 Mergers and Acquisitions

3.1.2 Synergistic Activities

3.1.3 Business Expansions and Funding

3.1.4 Product Launches and Approvals

3.1.5 Other Activities

3.2 Company Profiles

3.2.1 Amgen Inc.

3.2.1.1 Overview

3.2.1.2 Top Products / Product Portfolio

3.2.1.3 Top Competitors

3.2.1.4 Target Customers/End-Users

3.2.1.5 Key Personnel

3.2.1.6 Analyst View

3.2.2 Cartesian Therapeutics, Inc.

3.2.2.1 Overview

3.2.2.2 Top Products / Product Portfolio

3.2.2.3 Top Competitors

3.2.2.4 Target Customers/End-Users

3.2.2.5 Key Personnel

3.2.2.6 Analyst View

3.2.3 ArthroSi Therapeutics, Inc.

3.2.3.1 Overview

3.2.3.2 Top Products / Product Portfolio

3.2.3.3 Top Competitors
