Introduction to Europe AI and Semiconductors - A Server GPU Market

The Europe AI and semiconductor - a server GPU market accounted for \$5,337.8 million in 2023 and is expected to grow at a CAGR of 29.87% and reach \$19,718.7 million by 2028. The market for GPU servers is rising due to the growing popularity of edge computing, which handles data closer to its source rather than depending just on centralized cloud servers. Furthermore, the increasing trend for virtualization in workplace and data center settings propels the demand for GPU servers.

Market Introduction

Artificial Intelligence and semiconductor market in Europe is growing rapidly, especially in the server GPU segment due to increased usage of AI across industries and technical breakthroughs. In order to handle the sophisticated computations needed by AI applications, server GPUs are crucial for facilitating quicker data processing and better performance. The need for GPU servers is being driven primarily by the emergence of edge computing, which processes data closer to its source, and the expanding trend of virtualization in data centers and enterprise environments. Furthermore, the European Union's emphasis on digital transformation and its allocation of funds towards AI research and development are stimulating innovation and

augmenting market prospects. Leading companies in the industry are always improving their product lines to satisfy the changing requirements of semiconductor and artificial intelligence applications. This report explores the current market dynamics, leading companies, and future trends shaping the European server GPU market within the broader AI and semiconductor landscape.

Market Segmentation

Segmentation 1: by Application (End User)

Cloud Computing

HPC Application

Segmentation 2: by Product (Configuration Type)

Single GPU

Dual to Quad GPU

High-Density GPU

Segmentation 3: by Region

Germany

France

Netherlands

Italy

Ireland

U.K.

Rest-of-Europe

How can this report add value to an organization?

Product/Innovation Strategy: In the ever-evolving realm of server GPU technology, notable advancements are reshaping the landscape, with a focus on optimizing data center performance. Leveraging cutting-edge solutions, including AI-driven analytics and real-time monitoring platforms, server GPU technology offers intricate insights into server health, workload management, and resource utilization. Innovations such as advanced data center cooling techniques contribute to efficient temperature regulation, ensuring optimal server functionality. The market encompasses a diverse range of solutions, from high-performance computing platforms to precision cooling systems, enabling businesses to elevate operational efficiency and minimize resource utilization effectively.

Growth/Marketing Strategy: The AI and semiconductor – a server GPU market has experienced notable growth strategies adopted by key players. Business expansions, collaborations, and partnerships have played a crucial role. Companies are expanding their reach to multiple markets, establishing alliances, and entering research collaborations to strengthen their technological capabilities. Collaborative initiatives between technology companies and domain experts are propelling the advancement of cutting-edge monitoring tools. Furthermore, strategic joint ventures are facilitating the integration of diverse expertise, significantly enhancing the market presence of these solutions. This collaborative approach is pivotal in creating comprehensive, user-friendly, and efficient server GPU solutions.

Competitive Strategy: In the dynamic realm of the AI and semiconductor – a server GPU market, manufacturers are expanding their product portfolios to cater to diverse computing needs and applications. Rigorous competitive benchmarking reveals the distinct strengths of market players, highlighting their unique solutions and regional expertise. Strategic collaborations with research institutions and technology organizations are pivotal drivers of innovation, shaping the evolution of the server GPU landscape.

Contents

Scope of the Study
Executive Summary

1 MARKET

1.1 Industry Outlook

1.1.1 Ongoing Trends

1.1.1.1 Timeline of GPU and Server Design Upgrades

1.1.1.2 Data Center Capacities: Current and Future

1.1.1.3 Data Center Power Consumption Scenario

1.1.1.4 Other Industrial Trends

1.1.1.4.1 HPC Cluster Developments

1.1.1.4.2 Blockchain Initiatives

1.1.1.4.3 Super Computing

1.1.1.4.4 5G and 6G Developments

1.1.1.4.5 Impact of Server/Rack Density

1.1.2 Equipment Upgrades and Process Improvements

1.1.3 Adaptive Cooling Solutions for Evolving Server Capacities

1.1.3.1 Traditional Cooling Techniques

1.1.3.2 Hot and Cold Aisle Containment

1.1.3.3 Free Cooling and Economization

1.1.3.4 Liquid Cooling Systems

1.1.4 Budget and Procurement Model of Data Center End Users

1.1.5 Stakeholder Analysis

1.1.5.1 Value Chain Analysis

1.1.6 Ecosystem/Ongoing Programs

1.1.6.1 Consortiums, Associations, and Regulatory Bodies

1.1.6.2 Government Programs

1.1.6.2.1 Europe

1.2 Business Dynamics

1.2.1 Business Drivers

1.2.1.1 Surging Demand for Cryptocurrency Mining

1.2.1.2 Rising Enterprise Adoption of Data Center GPUs for High-Performance

Computing Applications

1.2.2 Business Challenges

1.2.2.1 High Bargaining Power of GPU Manufacturers

1.2.3 Market Strategies and Developments

1.2.4 Business Opportunities

1.2.4.1 Technological Advancement in High-Performing Computing (HPC)

1.2.4.2 Government Support for Smart City Development and Digitalization

2 REGION

2.1 Europe

2.1.1 Europe (by Country)

2.1.1.1 Italy

2.1.1.2 France

2.1.1.3 Netherlands

2.1.1.4 Germany

2.1.1.5 Ireland

2.1.1.6 U.K.

2.1.1.7 Rest-of-Europe

3 MARKETS - COMPETITIVE BENCHMARKING & COMPANY PROFILES

3.1 Competitive Benchmarking

3.2 Market Share Analysis

3.2.1 By GPU Manufacturer

3.2.2 By GPU Server Manufacturer

3.3 Company Profiles

3.3.1 GPU Manufacturer

3.3.1.1 Imagination Technologies

3.3.1.1.1 Company Overview

3.3.1.1.2 Product and Customer Portfolio Analysis

4 RESEARCH METHODOLOGY

4.1 Primary Data Sources

4.2 Secondary Data Sources

4.3 Market Estimation and Forecast
