Introduction to Europe Digital Surgery Technologies Market

The Europe digital surgery technologies market is projected to reach \$3,769.2 million by 2033 from \$215.7 million in 2023, growing at a CAGR of 33.12% during the forecast period 2023-2033. The increased interest in surgical innovation by technologists and start-ups, the increased precision offered by digital surgery techniques, and the possibility of better post-operative rehabilitation due to sophisticated pre-surgical planning are the main factors propelling the growth of the digital surgery technologies market in Europe.

Market Introduction

Advances in surgical innovation and the growing adoption of cutting-edge technologies in the healthcare industry are driving the robust growth of the European digital surgery technologies market. With Europe remaining at the forefront of medical technology and research, there is a growing trend toward the use of digital tools during surgery. With previously unheard-of levels of accuracy and precision, these technologies—which include robotically assisted surgery, AI-driven diagnostics, and sophisticated imaging systems—are completely changing the way surgeries are planned, performed, and monitored.

Europe's need for digital surgery technologies is being driven by an increasing

emphasis on patient safety, increased surgical accuracy, and better post-operative rehabilitation. Using digital solutions can help surgeons become more proficient, lower their risk of complications, and improve patient outcomes. Furthermore, the area's robust regulatory framework and emphasis on quality care are accelerating the adoption of these advanced technologies in hospitals and surgical centers.

Market Segmentation

Segmentation 1: by Technology

Augmented Reality and Virtual Reality

AI Algorithms

Mixed Reality

Other Technologies

Segmentation 2: by Product

Surgical Navigation and Advanced Visualization

Surgical Simulation Systems

Surgical Planning

Surgical Data Science

Segmentation 3: by Country

U.K.

Germany

How can this report add value to an organization?

Product/Innovation Strategy: The Europe digital surgery technologies market has been extensively segmented based on various categories, such as technology and products. This can help readers get a clear overview of which segments account for the largest share and which ones are well-positioned to grow in the coming years.

Competitive Strategy: The Europe digital surgery technologies market has numerous established players with product portfolios. Key players in the Europe digital surgery technologies market analyzed and profiled in the study involve established players offering products for digital surgery.

Key Market Players and Competition Synopsis

The companies profiled have been selected based on inputs gathered from primary experts and analyzing company coverage, type portfolio, and market penetration.

Some prominent names in the market include:

Brainlab AG

FundamentalVR

Medtronic plc

Surgical Science Sweden AB

VirtaMed AG

Contents

Executive Summary
Scope and Definition

1 MARKETS

1.1 Trends: Current and Future Impact Assessment

1.1.1 Integration of Augmented Reality (AR) and Virtual Reality (VR) in Surgical Procedures

1.1.2 Increasing Investment and Funding for Digital Surgery Technologies

1.1.3 Increasing Partnerships among Players

1.2 R&D Review

1.2.1 Patent Filing Trend (by Year, Country)

1.3 Database of the FDA-Approved AI/ML-Based Medical Devices and Algorithms, 2023

1.4 Regulatory Landscape

1.4.1 Regulatory Framework in Europe

1.4.1.1 Changes in Rule

1.4.1.2 New Rules in the Annexure VIII

1.4.1.3 Major Changes in the EU due to the Implementation of MDR

1.4.1.3.1 Expanded Device Definitions Requiring Re-Examination of the Current

Classification of All Devices

1.4.1.3.2 Quality Management System

1.4.1.3.3 Technical File

1.4.1.3.4 Need to Comply with New Identification and Traceability (UDI)

Requirements

1.4.1.3.5 More Emphasis on Post-Market Surveillance

1.4.1.3.6 Role of Internal Audits and Requirement of Audits to be Strengthened

1.4.1.3.7 Dedicated Personnel for MDR Compliance

1.4.2 Consortiums, Associations, and Regulatory Bodies

1.4.3 Restraints in the Current Regulatory Process for AI/ML-Based Medical Devices/Algorithms

1.5 Consumer Analysis

1.5.1 End-Result Analysis

1.6 Case Studies

1.6.1 Case Study: Training for Orthopedic Surgery

1.6.2 Case Study: Enhancing Surgical Performance and Teamwork through Video-Based Analytics

1.6.3 Case Study: Surgical Navigation, and Advanced Visualization Systems,

Augmented Reality (AR)

1.6.4 Case Study: Enhancing Surgical Skill

1.7 Impact Analysis for Key Global Events - COVID-19

1.8 Market Dynamics: Overview

1.8.1 Market Drivers

1.8.1.1 Increasing Interest of Technologists and Start-Ups

1.8.1.2 Increased Adoption of AR/VR Surgical Simulators

1.8.1.3 Improved Precision and Promising Post-Operative Rehabilitation through Pre-

Surgical Planning

1.8.2 Market Opportunities

1.8.2.1 Ensuring Data Security and Privacy in Digital Surgery

1.8.2.2 Growing Use of Digital Surgery Technologies Potentially Offsetting the Initial

Investment over Time in Hospitals

1.8.3 Market Challenges

1.8.3.1 Substantial Expenses Associated with Installation and Maintenance

1.8.3.2 Requirement of Additional Surgical Training for Use of Digital Surgery

Products

2 REGIONS

2.1 Regional Summary

2.2 Europe

2.2.1 Regional Overview

2.2.2 Key Market Participants in Europe

2.2.3 Driving Factors for Market Growth

2.2.4 Factors Challenging the Market

2.2.5 Application

2.2.6 Product

2.2.7 France

2.2.8 Germany

2.2.9 U.K.

2.2.10 Spain

2.2.11 Italy

2.2.12 Rest-of-Europe
