The global automotive industry is going through a period of wide-ranging and transformative changes with the shift in the consumer behavior as well as increasing implementation of stringent environmental regulations. Factors such as rising safety and security concerns, increasing demand for reliable transportation system, and advent of revolutionary trends, such as transition from car ownership to “Mobility as a Service” (MaaS), are expected to increase the demand for autonomous vehicles. Autonomous vehicles are the key to changing urban transportation beyond recognition in the next few years. There are both traditional OEMs and new vehicle developers who are working in this ecosystem to improve and introduce fully-autonomous vehicles on the road. These vehicles will have advanced features from traditional vehicles and improve the driving experience for passengers. The Society of Automotive Engineers International (SAE) has defined six levels of automation to classify a system’s sophistication, ranking from 0 to 5.

Level 0: No Automation

In this level, the driver is in control of the entire vehicle and all aspects of driving are entirely manually controlled. Example of such a vehicle is 2018 KIA Rio, among others.

Level 1: Driver Assistance

In this level, the vehicle system can assist with some functions such as controlling the

steering or the vehicle speed. The driver handles a majority of the vehicle functions. Features such as adaptive cruise control or lane keeping are part of this level of automation.

Level 2: Partial Automation

In this level, the vehicle system is able to control the braking, steering, or acceleration of the vehicle. These features can be applied together and the coordination between two or more of these assist technologies helps a vehicle to be of Level 2 status. A driver is there during all times to actively monitor the vehicle's progress and be ready to intervene at any time. Most vehicles in 2018 have these features of Level 2 such as GM Super Cruise, Mercedes-Benz Distronic Plus, Tesla Autopilot, Nissan ProPilot Assist, and Volvo Pilot Assist, among others.

Level 3: Conditional Automation

In this level, the vehicle system is able to detect the environment around the vehicle using sensors such as LiDARs and make informed decisions for the vehicle such as overtaking a slower moving vehicle in front of it. The vehicle system is able to manage most aspects of driving, including monitoring the environment. The system prompts the driver to intervene when it encounters a scenario it can't navigate. Audi Traffic Jam Assist is the only commercialized level 3 auto pilot system developed by Audi for Audi A8.

Level 4: High Automation

In this level, the vehicle can operate without human intervention but only in certain conditions. There is an option to manually override the vehicle system functions.

Level 5: Full Automation

In this level, the vehicles can operate as driverless vehicles in any road conditions. These vehicles are being developed to be used as robo-taxis, such as Waymo, among others.

The global autonomous vehicle market has witnessed several strategic and technological developments in the past few years, undertaken by the different market players to attain their respective market shares in this emerging domain. Some of the strategies covered in this section are product launches and developments, business

expansions, and partnerships/collaborations/joint venture. The preferred strategy for the companies have been product launches & developments in order to strengthen their position in the global autonomous vehicle market.

According to BIS Research analysis, the global autonomous vehicle market was valued at 6.6 million units in 2017 and is expected to reach 67.5 million units by 2028, registering a CAGR of 20.78% between 2018 and 2028. North America dominated the global autonomous vehicle market in 2018, whereas, Rest-of-the-World is expected to have the highest growth rate during the forecast period 2018-2023.

The key market players in the global autonomous vehicle market are Audi AG, BMW Group, Daimler AG, FCA Italy S.p.A., Ford Motor Company, General Motor Company, Nissan Motor Corporation, Tesla Inc., Toyota Motor Corporation, Volkswagen AG, Volvo Group, Waymo LLC, and Zoox Inc.

The report is a compilation of different segments of the global autonomous vehicle market including market breakdown by level of autonomy, vehicle type, and region. The report further takes into consideration the market dynamics and the competitive landscape. The report also discusses in detail about the key participants involved in the industry. The report answers the following questions about the global autonomous vehicle market:

What is ADAS and autonomous driving?

How big is the global autonomous vehicle market in terms of volume and what is the CAGR (2018-2028)?

What is the volume of different types of autonomous vehicle, such as level 1, level 2, level 3, level 4, and level 5?

What is the volume of different types of autonomous vehicles, such as passenger cars, and commercial vehicles (heavy trucks and heavy buses)?

What is the market size of different regions such as North America, Europe, Asia-Pacific, and Rest-of-the-World (RoW)?

Which are the key companies operating in the global autonomous vehicle market?

Which major factors are expected to impact the global autonomous vehicle market?

What are the key market strategies adopted by the autonomous vehicle market players?

Contents

1 MARKET OVERVIEW

1.1 Autonomous Vehicle

1.1.1 Overview

1.1.2 Level of Autonomy

1.2 Advance Driver Assistance System (ADAS)

1.2.1 Overview

1.2.2 ADAS Features

1.3 Regulatory Landscape

1.3.1 Current Laws and Regulatory Bodies Related to Autonomous Vehicles by Country

1.3.2 Current Laws and Regulatory Bodies Related to Testing or Experimentation of Autonomous Vehicles, by Country

1.3.3 Regulatory Agencies for Driverless Vehicle

1.4 Government Initiatives

1.5 Autonomous Vehicle: The Start-Up Story

1.5.1 Key Upcoming Start-Ups

1.6 Consortiums and Associations

1.7 Investment by Major OEMs and Tier 1 Component Providers

2 MARKET DYNAMICS

2.1 Drivers

2.1.1 Increasing Push from Government as Well as Consumers to Ensure Road Safety, Which Boost the Demand for Reliable Transportation System

2.1.2 Increasing Push from the Government to Develop Connected and Autonomous Infrastructure

2.1.3 Increased Government Focus on Streamlined Traffic Infrastructure

2.1.4 Impact of Market Drivers

2.2 Challenges

2.2.1 Safety and Reliability Issues with Autonomous Vehicles

2.2.2 Non-Availability of Required Infrastructure and Undefined Legal Responsibility and in Developing Countries

2.2.3 Rise in Cyber Threat due to Increase of Data

2.2.4 Impact of Market Challenges

2.3 Opportunities

2.3.1 Increasing Focus on Vehicle Platooning

2.3.2 Transition from Car ownership to Mobility-as-a-Service (MaaS)

- 2.3.3 Revenue Generation Opportunity for Different Layers of Automotive Ecosystem
- 2.3.4 Wide Ranging Opportunities for Luxury Cars (Level 1 and Level 2) in Emerging Economies

3 COMPETITIVE INSIGHTS

- 3.1 Introduction
 - 3.1.1 Product Launches and Developments
 - 3.1.2 Business Expansion
 - 3.1.3 Partnerships/Collaborations/Joint Ventures
- 3.2 Automotive OEM Preparedness Index for Future of Autonomy
- 3.3 Value Chain Analysis
- 3.4 Patent Analysis
 - 3.4.1 Introduction
 - 3.4.2 Key Patent: ADAS and Autonomous Driving Component
 - 3.4.3 Patent Landscape

4 ASSUMPTIONS AND LIMITATIONS

- 4.1 Assumptions and Limitations for Market Size Calculations

5 GLOBAL AUTONOMOUS VEHICLE MARKET BY LEVEL OF AUTONOMY

- 5.1 Level
 - 5.1.1 Level 1 Autonomous Vehicle Market by Vehicle Type
 - 5.1.2 Level 1 Autonomous Vehicle Market by Region
- 5.2 Level
 - 5.2.1 Traffic Jam Assist
 - 5.2.2 Park Assist
 - 5.2.3 Level 2 Autonomous Vehicle Market, by Vehicle Type
 - 5.2.4 Level 2 Autonomous Vehicle Market, by Region
- 5.3 Level
 - 5.3.1 Highway Chauffeur
 - 5.3.2 Traffic Jam Pilot
 - 5.3.3 Level 3 Autonomous Vehicle Market by Vehicle Type
 - 5.3.4 Level 3 Autonomous Vehicle Market, by Region
- 5.4 Level
 - 5.4.1 Valet Parking/Parking Garage Pilot
 - 5.4.2 Highway Pilot

5.4.3 Level 4 Autonomous Vehicle Market by Vehicle Type

5.4.4 Level 4 Autonomous Vehicle Market by Region

5.5 Level

5.5.1 Level 5 Autonomous Vehicle Market by Vehicle Type

5.5.2 Level 5 Autonomous Vehicle Market by Region

6 GLOBAL AUTONOMOUS VEHICLE MARKET BY VEHICLE TYPE

6.1 Passenger Vehicle

6.1.1 Autonomous Passenger Vehicles Market, by Level of Autonomy

6.1.2 Autonomous Passenger Vehicle Market, by Region

6.2 Commercial Vehicles

6.2.1 Autonomous Commercial Vehicles Market, by Level of Autonomy

6.2.2 Autonomous Commercial Vehicles Market, by Type

6.2.2.1 Heavy Trucks

6.2.2.2 Heavy Buses

6.2.3 Autonomous Commercial Vehicles Market, Market by Region

7 GLOBAL AUTONOMOUS VEHICLE MARKET BY REGION

7.1 North America

7.1.1 North America Autonomous Vehicle Market by Level of Autonomy

7.1.2 North America Autonomous Vehicle Market, by Vehicle Type

7.1.3 North America Autonomous Vehicle Market (by Country)

7.1.3.1 The U.S.

7.1.3.2 Canada

7.1.3.3 Mexico

7.2 Europe

7.2.1 Europe Autonomous Vehicle Market by Level of Autonomy

7.2.2 Europe Autonomous Vehicle Market by Vehicle Type

7.2.3 Europe Autonomous Vehicle Market, by Country

7.2.3.1 The U.K.

7.2.3.2 Germany

7.2.3.3 France

7.2.3.4 Rest-of-Europe

7.3 Asia-Pacific (APAC)

7.3.1 APAC Autonomous Vehicle Market by Level of Autonomy

7.3.2 APAC Autonomous Vehicle Market by Vehicle Type

7.3.3 APAC Autonomous Vehicle Market by Country

7.3.3.1 China

7.3.3.2 Japan

7.3.3.3 South Korea

7.3.3.4 Rest-of-APAC

7.4 Rest-of-the-World (RoW)

7.4.1 RoW Autonomous Vehicle Market by Level of Autonomy

7.4.2 RoW Autonomous Vehicle Market by Vehicle Type

7.4.3 RoW Autonomous Vehicle Market by Country

7.4.3.1 Latin America

7.4.3.2 Middle East and Africa (MEA)

8 COMPANY PROFILE

8.1 AUDI AG

8.1.1 Company Overview

8.1.2 Product Offering

8.1.3 Financials

8.1.3.1 Financial Summary

8.1.4 SWOT Analysis

8.2 BMW Group

8.2.1 Company Overview

8.2.2 Product Offering

8.2.3 Financials

8.2.3.1 Financial Summary

8.2.4 SWOT Analysis

8.3 Daimler AG

8.3.1 Company Overview

8.3.2 Product Offering

8.3.3 Financials

8.3.3.1 Financial Summary

8.3.4 SWOT Analysis

8.4 FCA Italy S.p.A.

8.4.1 Company Overview

8.4.2 Product Offering

8.4.3 Financials

8.4.3.1 Financial Summary

8.4.4 SWOT Analysis

8.5 Ford Motor Company

8.5.1 Company Overview

- 8.5.2 Product Offering
- 8.5.3 Financials
 - 8.5.3.1 Financial Summary
- 8.5.4 SWOT Analysis
- 8.6 General Motors
 - 8.6.1 Company Overview
 - 8.6.2 Product Offering
 - 8.6.3 Financials
 - 8.6.3.1 Financial Summary
 - 8.6.4 SWOT Analysis
- 8.7 MAN SE
 - 8.7.1 Company Overview
 - 8.7.2 Product Offering
 - 8.7.3 Financials
 - 8.7.3.1 Financial Summary
 - 8.7.4 SWOT Analysis
- 8.8 Nissan Motor Co., Ltd
 - 8.8.1 Company Overview
 - 8.8.2 Product Offering
 - 8.8.3 Financials
 - 8.8.3.1 Financial Summary
 - 8.8.4 SWOT Analysis
- 8.9 Tesla, Inc.
 - 8.9.1 Company Overview
 - 8.9.2 Product Offering
 - 8.9.3 Financials
 - 8.9.3.1 Financial Summary
 - 8.9.4 SWOT Analysis
- 8.10 Toyota Motor Corporation
 - 8.10.1 Company Overview
 - 8.10.2 Product Offering
 - 8.10.3 Financials
 - 8.10.3.1 Financial Summary
 - 8.10.4 SWOT Analysis
- 8.11 Volkswagen AG
 - 8.11.1 Company Overview
 - 8.11.2 Product Offering
 - 8.11.3 Financials
 - 8.11.3.1 Financial Summary

8.11.4 SWOT Analysis

8.12 Volvo Group

8.12.1 Company Overview

8.12.2 Product Offering

8.12.3 Financials

8.12.3.1 Financial Summary

8.12.4 SWOT Analysis

8.13 Waymo LLC

8.13.1 Company Overview

8.13.2 Product Offering

8.13.3 SWOT Analysis

8.14 Zoox Inc.

8.14.1 Company Overview

8.14.2 Product Offering

8.14.3 SWOT Analysis

9 RESEARCH SCOPE AND METHODOLOGY

9.1 Scope of the Report

9.2 Global Autonomous Vehicle Market Research Methodology

List Of Tables

LIST OF TABLES

Table 1.1: Current Laws and Regulatory Bodies Related to Autonomous Vehicles by Country
