Key Questions Answered in this Report:

What are the major market drivers, challenges, and opportunities in the global C-arms market?

Which opportunistic scenarios are expected to be witnessed by the global C-arms market over the forecast period?

How is each type of product in the C-arms market expected to evolve in the forecast period?

What are the demand and pricing trends for C-arms over the forecast period?

What are the underlying structures resulting in the emerging trends within the C-arms industry?

What was the market value of the leading segments and sub-segments of the global C-arms market in 2018?

How is each segment of the global C-arms market expected to grow during the forecast period and what is the revenue anticipated to be generated by each of

the segments by the end of 2029?

What are the influencing factors that may affect the market share of the key players?

How is the industry expected to evolve during the forecast period 2019- 2029?

What are the key developmental strategies which are implemented by the key players to sustain in the competitive market?

What are the key product types in the global C-arms market? What are the major benefits of each type?

What are the key applications in the global C-arms market? What are the major benefits of each type?

What is the market share of each of the companies in the global C-arms market and what are their contributions?

Which are the key manufacturers in C-arms market, and what are their contributions?

Overview on the Global C-Arms Market

Global medical device industry is driven by the innovative product launches, advancement in the devices, and a solution-oriented approach of the manufacturers toward product development. The medical device industry is growing at a robust pace owing to the high demand for diagnostic and therapeutic devices treat acute and chronic diseases. There is constant increase in the number of cardiac, neurological, gastroenterological, and orthopedic diseases among other diseases. Therefore, the C-arms market is growing at decent pace as such diseases requires interventional approach for effective treatment. Further, the demand is fueled by significant improvement in the overall medical devices regulatory and formation of dedicated government bodies for medical device approval.

A C-arm is an imaging scanner intensifier that is used for a variety of diagnostic imaging and minimally invasive surgical procedures. The global number of interventional procedures has been on the rise, and C-arms are expected to offer a flexible and cost-

effective choice for image guidance during procedures across the medical facilities. C-arms are medical imaging devices that are based on X-ray technology and can be used flexibly in various operating rooms within hospitals, clinics, and medical centers. The name is derived from the C-shaped arm that is used to connect the X-ray source and X-ray detector to one another.

C-Arms Market Forecast, 2019-2029

The C-Arms Industry Analysis by BIS Research projects the market to grow at a significant CAGR of 4.82% during the forecast period from 2019 to 2029. The C-arms Market Size is valued at \$1,617.4 million in 2018. The North America region dominated the global C-arms market in 2018, whereas Asia-Pacific is expected to have the highest growth rate, during the forecast period.

The C-arms market growth is majorly driven by factors such as product innovation, technological leadership, and establishment of hybrid operating rooms. The rapid introduction of the image-guided intervention in the emerging economy markets, such as India, Thailand, Malaysia, North Africa, and Saudi Arabia is the key driver for the growth on a global level. However, the high cost of the devices is the major concern for the end users such as hospitals, ambulatory surgical centers, and specialty clinics. Such factors are likely to disrupt the market growth over the forecast period. Moreover, substantial increase in the healthcare expenditure, has attracted more attention of investors for the C-arms market. Therefore, to sustain in the highly competitive market, the C-arms are gradually evolving as an advanced therapeutic tool in medical device industry with additional benefits, including high precision, live imaging, easy to handle and cost-effectiveness. Additionally, the manufacturers in the C-arms market seeking relaxation in the legal requirements and regulations to abridge the R&D as well as the approval process for their products. Thus, providing companies to devote more time to solve complex challenges by innovating new components or technologies to attain better product efficiency.

Expert Quote

Governments of numerous countries are creating policies and taking initiatives to increase the deployment rate of hybrid operating rooms. Additionally, the compact mini C-arm segment is anticipated to be the potential segment, expected to register the highest CAGR of 6.20% from 2019 to 2029. This is mainly due to ongoing research and development for product enhancements, growing digital healthcare industry, widespread adoption of image guiding systems for surgical procedures as a go-to treatment option,

and technological innovations in medical devices.

Scope of the Global C-Arms Market

The C-Arms market research provides a detailed perspective regarding the applications of the product type, application, and region, among others. The purpose of this market analysis is to analyze the C-arms industry outlook in terms of factors driving the market, trends, technological developments, and funding scenario, among others.

The report further takes into consideration the market dynamics and the competitive landscape along with the detailed financial and product contribution of the key players operating in the market. The C-arms market report is a compilation of different segments including market breakdown by product type, application, and region.

Global C-Arms Market Segmentation

The C-Arms market segmentation is done on the basis of product type is further segmented into mini, compact, full-size, and super-C. The full-size segment dominated the global C-Arms market, accounting for around 42.45% of the total market in 2018 and is anticipated to maintain its dominance throughout the forecast period (2019-2029). This is mainly due to the increasing geriatric populace, escalating prevalence of chronic and acute conditions requiring C-arms and rise in the number of reimbursement schemes by different governments across the globe.

The C-Arms market segmentation is done on the basis of application is further segmented into orthopedics and trauma, cardiovascular, neurosurgery, pain management, gastroenterology, and others. The orthopedics and trauma segment dominated the global C-Arms market, accounting for around 32.67% of the total market in 2018 and is anticipated to maintain its dominance throughout the forecast period. This is mainly due to the rise in accidents at the time of sports and other road accidents at high rate in both the developed and developing economies.

The C-Arms market segmentation by region is segregated under five major regions, such as North America, Europe, Asia-Pacific, Latin America, and Middle East and Africa. North America and Europe are expected to retain the leading positions throughout the forecast period (2019-2029), accounting for shares of 33.73% and 30.39%, respectively, of the total market in 2029. This is mainly due to the presence of the leading players in these regions along with higher adoption of advanced medical devices and advanced techniques for treatment and prevention of acute and chronic

diseases.

Key Companies in the C-Arms Industry

The key market players in the global C-Arms market are ARI Medical Equipment Co., Ltd., Canon Inc., DMS Group, Eurocolumbus s.r.l., GE Healthcare, Gemss Co. Ltd., Hologic Inc., Medonica Co., Ltd., Orthoscan, Inc., Perlong Medical, Koninklijke Philips N.V., Shimadzu Corporation, Siemens Healthineers, Villa Sistemi Medicali Spa, and Ziehm Imaging GmbH.

Contents

EXECUTIVE SUMMARY

1 MARKET OVERVIEW

- 1.1 Introduction
- 1.2 Components of a C-arm
 - 1.2.1 C-Arm X-ray Tubes
 - 1.2.2 C-Arm Image Intensifier
 - 1.2.3 C-Arm CCD Camera
 - 1.2.4 C-Arm High Voltage Cables
- 1.3 From Analog to Digital Technology
- 1.4 Assumptions and Limitations

2 MARKET DYNAMICS

- 2.1 Impact Analysis
- 2.2 Market Drivers
 - 2.2.1 Rising preference for Minimally Invasive Surgeries
 - 2.2.2 Shifting Focus Toward Value Oriented Healthcare Model
 - 2.2.3 Strong Increase in Demand for Enhanced Imaging Technology
 - 2.2.4 Technological advancements
 - 2.2.4.1 Flat Panel Digital Detectors
 - 2.2.4.2 Complementary Metal Oxide Semiconductor (CMOS) Detector Technology
 - 2.2.4.3 Dose Optimization
 - 2.2.4.4 Easy to Handle Devices
 - 2.2.5 Favorable Government Initiatives
- 2.3 Market Restraints
 - 2.3.1 Lack of Skilled Professionals
 - 2.3.2 Risk of High Radiation Exposure to Limit the Use of C arms
- 2.4 Market Opportunities
 - 2.4.1 Development of Simulators for the Training of Professionals
 - 2.4.2 Growing Demand for Data Integrated Imaging Systems

3 COMPETITIVE LANDSCAPE

- 3.1 Key Developments and Strategies
 - 3.1.1 Product Launches

- 3.1.2 Partnerships
- 3.1.3 Acquisitions
- 3.1.4 FDA Clearance Approvals
- 3.1.5 Business Expansions
- 3.1.6 Collaborations and Agreements
- 3.2 Market Share Analysis
- 3.3 Growth Share Matrix Analysis
 - 3.3.1 Growth Share Matrix Analysis (by Product Type)
 - 3.3.2 Growth Share Matrix Analysis (by Application Type)
 - 3.3.3 Growth Share Matrix Analysis (by Region)

4 INDUSTRY INSIGHTS

- 4.1 Regulatory Framework
 - 4.1.1 Legal Requirements and Framework in North America
 - 4.1.2 Legal Requirements and Framework in Europe
 - 4.1.3 Legal Requirements and Framework in Asia-Pacific
 - 4.1.4 Legal Requirements and Framework in Latin America
 - 4.1.5 Legal Requirements and Framework in Middle East and Africa
- 4.2 Regulatory Bodies
- 4.3 Opportunity Map Analysis of C-Arms
- 4.4 Demand and Pricing Analysis
 - 4.4.1 Demand Analysis
 - 4.4.2 Pricing Analysis

5 GLOBAL C-ARMS MARKET (BY PRODUCT TYPE)

- 5.1 Full-Size C-Arms
- 5.2 Mini C-Arms
- 5.3 Compact C-Arms
- 5.4 Super-C C-Arms

6 GLOBAL C-ARMS MARKET (BY APPLICATION TYPE)

- 6.1 Orthopedics and Trauma
- 6.2 Cardiovascular
- 6.3 Neurosurgery
- 6.4 Pain Management
- 6.5 Gastroenterology

6.6 Other Applications

7 GLOBAL C-ARMS MARKET (BY END USER)

7.1 Hospitals

7.2 Specialty Clinics

7.3 Ambulatory Surgical Centers

7.3.1 Installation of Hybrid Operating Room

8 GLOBAL C-ARMS MARKET (BY REGION)

8.1 North America

8.1.1 U.S.

8.1.2 Canada

8.2 Europe

8.2.1 Germany

8.2.2 France

8.2.3 U.K.

8.2.4 Spain

8.2.5 Italy

8.2.6 Switzerland

8.2.7 Rest-of-Europe

8.3 Asia-Pacific (APAC)

8.3.1 Japan

8.3.2 China

8.3.3 Australia

8.3.4 India

8.3.5 Singapore

8.3.6 Rest-of-Asia-Pacific (RoAPAC)

8.4 Latin America

8.4.1 Brazil

8.4.2 Mexico

8.4.3 Argentina

8.4.4 Rest-of-Latin America (RoLA)

8.5 Middle East and Africa (MEA)

8.5.1 Saudi Arabia

8.5.2 Israel

8.5.3 United Arab Emirates (U.A.E)

8.5.4 Rest-of-Middle East and Africa

9 COMPANY PROFILES

9.1 ARI Medical Equipment Co., Ltd.

9.1.1 Company Overview

9.1.2 Role of ARI Medical Equipment Co., Ltd. in the Global C-Arms Market

9.1.3 SWOT Analysis

9.2 Canon Inc.

9.2.1 Company Overview

9.2.2 Role of Canon Inc. in the Global C-Arms Market

9.2.3 Financials

9.2.3.1 Key Insights on the Financial Health of the Company

9.2.4 SWOT Analysis

9.3 DMS Group

9.3.1 Company Overview

9.3.2 Role of DMS Group in the Global C-Arms Market

9.3.3 SWOT Analysis

9.4 Eurocolumbus s.r.l.

9.4.1 Company Overview

9.4.2 Role of Eurocolumbus s.r.l. in the Global C-Arms Market

9.4.3 SWOT Analysis

9.5 General Electric Company

9.5.1 Company Overview

9.5.2 Role of General Electric Company in the Global C-Arms Market

9.5.3 Financials

9.5.3.1 Key Insights on the Financial Health of the Company

9.5.4 SWOT Analysis: General Electric Company

9.6 Gemss Co. Ltd.

9.6.1 Company Overview

9.6.2 Role of Gemss Co. Ltd. in the Global C-Arms Market

9.6.3 SWOT Analysis

9.7 Hologic, Inc.

9.7.1 Company Overview

9.7.2 Role of Hologic Inc. in the Global C-Arms Market

9.7.3 Financials

9.7.3.1 Key Insights on the Financial Health of the Company

9.7.4 SWOT Analysis

9.8 Koninklijke Philips N.V.

9.8.1 Company Overview

9.8.2 Role of Koninklijke Philips N.V. in the Global C-Arms Market

9.8.3 Financials

9.8.3.1 Key Insights on the Financial Health of the Company

9.8.4 SWOT Analysis: Koninklijke Philips N.V.

9.9 Medonica Co., Ltd.

9.9.1 Company Overview

9.9.2 Role of Medonica Co., Ltd. in the Global C-Arms Market

9.9.3 SWOT Analysis

9.10 Orthoscan Inc.

9.10.1 Company Overview

9.10.2 Role of Orthoscan, Inc. in the Global C-Arms Market

9.10.3 SWOT Analysis

9.11 Perlong Medical Equipment Co.,Ltd.

9.11.1 Company overview

9.11.2 Role of Perlong Medical Equipment Co.,Ltd. in the Global C-Arms Market

9.11.3 SWOT Analysis

9.12 Shimadzu Corporation

9.12.1 Company Overview

9.12.2 Role of Shimadzu Corporation in the Global C-Arms Market

9.12.3 Financials

9.12.3.1 Key Insights on the Financial Health of the Company

9.12.4 SWOT Analysis

9.13 Siemens Healthineers AG

9.13.1 Company Overview

9.13.2 Role of Siemens Healthineers AG in the Global C-Arms Market

9.13.3 Financials

9.13.3.1 Key Insights on the Financial Health of the Company

9.13.4 SWOT Analysis: Siemens Healthineers AG

9.14 Villa Sistemi Medicali Spa

9.14.1 Company Overview

9.14.2 Role of Villa Sistemi Medicali Spa in the Global C-Arms Market

9.14.3 SWOT Analysis

9.15 Ziehm Imaging GmbH

9.15.1 Company Overview

9.15.2 Role of Ziehm Imaging GmbH in the Global C-Arms Market

9.15.3 SWOT Analysis

10 RESEARCH SCOPE AND METHODOLOGY

10.1 Product Definition

10.2 Scope of the Research Study
