## Global Military GNSS Anti-Jamming Systems Market Forecast, 2020-2025

The Global Military GNSS Anti-Jamming Systems Market report by BIS Research shows a significant growth in the market. The military GNSS anti-jamming systems market is anticipated to grow at a robust CAGR of 7.94% based on market value and 10.09% based on volume during the forecast period from 2020 to 2025. The rising intentional and unintentional activities of GNSS signals jamming and interference across the globe generates a substantial demand for GNSS anti-jamming systems. The jamming activities make military forces more vulnerable toward mission failures, therefore the demand for military GNSS anti-jamming systems is the need of the future. Additionally, growing deployment of unmanned military platforms, increasing expenditure on next-generation satellite programs, and rising cross-border conflicts are some of the factors due to which various countries are investing for military GNSS anti-jamming systems. Moreover, increasing benefit of miniaturization of military GNSS anti-jamming systems is another major factor which is expected to boost the demand for military GNSS anti-jamming systems in future. Furthermore, fulfilling the criteria of 2% of GDP on defense spending by NATO countries is also boosting the demand for electronic warfare systems including military GNSS anti-jamming systems.

However, the demand for military GNSS anti-jamming systems by value and volume is expected to decline 6.11% and 6.03% in 2020. This decline is expected due to the impact of Covid-19 pandemic across the globe. Defense sector also experiences disruption in supply chain and manufacturing process due to lockdown imposed to combat the spread of COVID-19 in all major economies of North America, Europe, and Asia-Pacific. Additionally, expected decline in the defense budget may delay the current and defer the proposed defense projects. The impact of COVID-19 is also expected in the market of military GNSS anti-jamming system in 2020 and 2021. The revival in the market of military GNSS anti-jamming systems is expected during the post Covid-19 duration from 2022 to 2025 with a significant rate.
