The global minimally invasive surgical systems market is a diverse market comprising of two broad segments: surgical robotics and conventional minimally invasive surgical systems which include laparoscopy and endoscopy. The surgical robotics market comprises surgical robots that can perform minimally invasive surgeries with high accuracy and sensitivity through tiny incisions. One of the very first robotic surgical systems (Da Vinci Surgical System) was approved by the FDA in the year 2000 for performing general laparoscopic surgeries. This technique received a widespread acceptance within the medical community and was adopted by hospitals in the U.S. as well as Europe for the treatment of a wide range of medical conditions. A surgical robotic system typically comprises a camera arm and mechanical arms with miniaturized surgical instruments attached to them. The surgeon remotely controls the arms with the help of a computing console which provides the surgeon with high definition, magnified, 3-dimensional view of the entire surgical suite. Some of the major benefits, offered by robotic-assisted surgery, include: fewer post-operative complications such as surgical site infections, less pain and blood loss during the operation, quick recovery, and less scars.

Conventional minimally invasive surgical systems form another dimension of the minimally invasive surgery (MIS) market which includes techniques such as laparoscopy and endoscopy. Laparoscopy is a minimally invasive surgical procedure which is used to examine the internal organs inside the abdomen. It utilizes a long, thin

tube (laparoscope) in conjunction with a high-intensity light source and a high-resolution camera at the front and is inserted through small incisions in the abdominal wall. After the insertion, the camera fitted at the front takes high-quality images and sends them to a video monitor and provides the surgeon with enhanced visualization of the internal organs.

Another technique called endoscopy is also a significant part of the conventional minimally invasive surgical market. It utilizes specialized instruments (endoscope) to visualize and operate on the internal organs (especially in the gastrointestinal track) as well as on the vessels of the body. An endoscope is typically a flexible, thin-shaped tube with an attached camera that provides the surgeon with enhanced visualization. In this technique, the surgeon inserts an endoscope through a small incision or opening in the body such as mouth. Endoscopic procedures are often named on the portion of the inspected digestive track such as upper GI endoscopy (examination of the esophagus, stomach, and the upper small bowel called duodenum), Colonoscopy (inspection of the abnormalities in the mucous lining of the intestine or bleeding in the colon), and Enteroscopy (examination of the small bowel), among others.

The market report is well designed to provide an all-inclusive field of vision about the global minimally invasive surgical systems market in terms of various factors, such as recent trends, technological advancements, competitive landscape, and regulatory environment of the market. The scope of this report is centred upon conducting a detailed study of the solutions allied with the global minimally invasive surgical systems market. The market has been segmented into 'Products', 'Components', 'Application', 'End Users', and 'Region'. The report presents the reader with an opportunity to unlock comprehensive insights with respect to the market and helps in forming well-informed strategic decisions. The research uncovers some of the substantial parameters that must be taken into consideration before entering the market.

This research report aims at answering various aspects of the global minimally invasive surgical systems market with the help of the key factors driving the market, threats that can possibly inhibit the overall growth of the market, and the current investment opportunities that are going to shape the future trajectory of the market expansion. The study considers the Growth-Share Matrix Model for a comprehensive study of the global minimally invasive surgical systems market and assesses the factors governing the same.

The answers to the following key questions can be derived from this report:

What are the major market drivers, challenges, and opportunities in the global minimally invasive surgical systems market?

What was the market value of the leading segments and sub-segments of the global minimally invasive surgical systems market in 2017?

How will each segment of the global minimally invasive surgical systems market grow during the forecast period, and what will be the revenue generated by each of the segments by the end of 2025?

What are the influencing factors that may affect the market share of the leading players?

How will the industry evolve during the forecast period 2018- 2025?

What are the key developments and strategies that are implemented by the key players to sustain in this market?

What are the key application areas of the global minimally invasive surgical systems market? How are minimally invasive surgical systems employed in different areas of application?

Who are the key players in the global minimally invasive surgical systems market, and what are their contributions?

What is the scope of expansion by the key players of the global minimally invasive surgical systems market in Asia, Latin America, and Middle East?

The competitive scenario in the global minimally invasive surgical systems market can be visualized as two different sub-groups- manufacturers of surgical robotic systems (such as Intuitive Surgical Inc., Mazor Robotics Ltd., Medrobotics Corporation, Auris Surgical Robotics, TransEnterix Inc., and Renishaw plc., among others) and manufacturers of laparoscopic and endoscopic instruments and equipment (Olympus Corporation, Hoya Corporation, Conmed Corporation, Ethicon Endo-Surgery, Inc., Encision, Inc., Stryker Corporation and Karl Storz, among others).

## Contents

### EXECUTIVE SUMMARY

### 1 RESEARCH SCOPE AND METHODOLOGY

- 1.1 Report Scope
- 1.2 Research Methodology
- 1.3 Market Segmentation
- 1.4 Assumptions
- 1.5 Data and Prediction Modelling

### 2 MARKET OVERVIEW

- 2.1 Global Addressable Market Size and Growth Potential
  - 2.1.1 Surgical Robotic Systems: Market Size, Installation Volume 2015-2025
  - 2.1.2 North America (U.S. and Canada)
  - 2.1.3 Europe (U.K., Germany, France, Italy, Spain, Netherlands, Belgium, Switzerland, Russia, and Rest of Europe)
  - 2.1.4 Asia Pacific (Japan, China, S. Korea, Australia, India, Malaysia, Singapore, HongKong, Thailand, and Rest of Asia Pacific)
  - 2.1.5 Latin America (Brazil, Mexico and, Rest of Latin America)
  - 2.1.6 Middle East and Africa (KSA, Israel, UAE, South Africa, and Kenya)
  - 2.1.7 Rest of World
- 2.2 Conventional Minimally Invasive Surgical Equipment (Endoscopic and Laparoscopic Surgery Equipment): Market Size, Annual Sales Volume 2015-2025
  - 2.2.1 North America (U.S. and Canada)
  - 2.2.2 Europe (U.K., Germany, France, Italy, Spain, Netherlands, Belgium, Switzerland, Russia, and Rest of Europe)
  - 2.2.3 Asia Pacific (Japan, China, S. Korea, Australia, India, Malaysia, Singapore, HongKong, Thailand, and Rest of Asia Pacific)
  - 2.2.4 Latin America (Brazil, Mexico and, Rest of Latin America)
  - 2.2.5 Middle East and Africa (KSA, Israel, UAE, South Africa and, Kenya)
  - 2.2.6 Rest of World
- 2.3 Recent Developments, 2010-2017
  - 2.3.1 Surgical Robotic Systems
  - 2.3.2 Conventional Minimally Invasive Surgical Equipment
- 2.4 Product Launches, 2010-2015
  - 2.4.1 Surgical Robotic Systems

- 2.4.2 Conventional Minimally Invasive Surgical Equipment
- 2.5 Current and Future Technology Trends
  - 2.5.1 Surgical Robotic Systems
    - 2.5.1.1 Surgical Robot Development
    - 2.5.1.2 OR Integration
    - 2.5.1.3 Teleoperated system
    - 2.5.1.4 Advanced Imaging Diagnostic Integration
    - 2.5.1.5 Future Trends in Robotic Surgery
  - 2.5.2 Conventional Minimally Invasive Surgical Equipment
    - 2.5.2.1 Visualization System
      - 2.5.2.1.1 Camera Systems
        - 2.5.2.1.1.1 2D Camera
        - 2.5.2.1.1.2 3D Camera
        - 2.5.2.1.1.3 4K Camera
        - 2.5.2.1.1.4 HD Camera
      - 2.5.2.1.2 Light Sources
        - 2.5.2.1.2.1 Xeon
        - 2.5.2.1.2.2 LED
      - 2.5.2.1.3 Displays and Monitors
      - 2.5.2.1.4 Camera Head Sensors
        - 2.5.2.1.4.1 CCD
        - 2.5.2.1.4.2 CMOS
    - 2.5.2.2 OR Integration
    - 2.5.2.3 Advanced Imaging Diagnostic Integration
- 2.6 Product Regulations (U.S., Europe, Japan, and China)
  - 2.6.1 Surgical Robotic Systems
  - 2.6.2 Conventional Minimally Invasive Surgical Equipment

### **3 INDUSTRY OVERVIEW**

- 3.1 Surgical Robotic Systems
  - 3.1.1 Mergers and Acquisitions
  - 3.1.2 Partnerships, Collaborations and Joint Ventures
  - 3.1.3 Business Expansions and Contracts
  - 3.1.4 Potter's Five Forces Analysis
  - 3.1.5 Market Attractiveness Analysis
    - 3.1.5.1 North America
    - 3.1.5.2 Europe
    - 3.1.5.3 Asia Pacific

- 3.1.5.4 Latin America
- 3.1.5.5 Middle East and Africa
- 3.2 Conventional Minimally Invasive Surgical Equipment
  - 3.2.1 Mergers and Acquisitions
  - 3.2.2 Partnerships, Collaborations and Joint Ventures
  - 3.2.3 Business Expansions and Contracts
  - 3.2.4 Potter's Five Forces Analysis
  - 3.2.5 Market Attractiveness Analysis
    - 3.2.5.1 North America
    - 3.2.5.2 Europe
    - 3.2.5.3 Asia Pacific
    - 3.2.5.4 Latin America
    - 3.2.5.5 Middle East and Africa

## **4 MAJOR DEMAND DETERMINANTS**

- 4.1 Surgical Procedure Volumes, 2010-2016
  - 4.1.1 Procedures with Surgical Robots
    - 4.1.1.1 General Surgery
      - 4.1.1.1.1 Bronchoscopy
      - 4.1.1.1.2 Arthroscopy
      - 4.1.1.1.3 Laparoscopy
      - 4.1.1.1.4 Endoscopy
    - 4.1.1.2 Interventional Cardiology
    - 4.1.1.3 Gynecology Surgery
    - 4.1.1.4 Orthopedics Surgery
    - 4.1.1.5 Urologic Surgery
    - 4.1.1.6 Bariatric Surgery
    - 4.1.1.7 Neurological Surgery
    - 4.1.1.8 Others
  - 4.1.2 Procedures with Conventional Minimally Invasive Surgical Equipment
    - 4.1.2.1 General Surgery
      - 4.1.2.1.1 Bronchoscopy
      - 4.1.2.1.2 Arthroscopy
      - 4.1.2.1.3 Laparoscopy
      - 4.1.2.1.4 Endoscopy
    - 4.1.2.2 Interventional Cardiology
    - 4.1.2.3 Gynecology Surgery
    - 4.1.2.4 Orthopaedics Surgery

- 4.1.2.5 Urologic Surgery
- 4.1.2.6 Bariatric Surgery
- 4.1.2.7 Neurological Surgery
- 4.1.2.8 Others

## **5 MARKET DYNAMICS**

- 5.1 Surgical Robotic Systems
  - 5.1.1 Drivers
  - 5.1.2 Challenges
  - 5.1.3 Opportunities
- 5.2 Conventional Minimally Invasive Surgical Equipment
  - 5.2.1 Drivers
  - 5.2.2 Challenges
  - 5.2.3 Opportunities

## **6 COMPARATIVE ANALYSIS BETWEEN SURGICAL ROBOTICS AND CONVENTIONAL MINIMALLY INVASIVE SURGICAL EQUIPMENT**

- 6.1 Demand Analysis
- 6.2 Future Opportunity Mapping
- 6.3 Procedure Cost Comparison
- 6.4 Equipment Cost Comparison
- 6.5 Patient Compliances Comparison
- 6.6 End-User Perception (Surgeons)
- 6.7 Decision Making and Surgeon Influences
- 6.8 Regional Comparison of Adoption Rate
- 6.9 Competitive Dynamics
- 6.10 Product Cannibalism

## **7 PRICING ANALYSIS**

- 7.1 Surgical Robotic Systems
  - 7.1.1 Systems/Console
  - 7.1.2 Surgical Robotic Consumables
  - 7.1.3 Accessories
  - 7.1.4 Software
  - 7.1.5 Annual Maintenance
- 7.2 Conventional Minimally Invasive Surgical Equipment

- 7.2.1 Endoscopes
- 7.2.2 Capsule Endoscopes
- 7.2.3 Visualization Systems
- 7.2.4 Laparoscopes
- 7.2.5 Accessories
- 7.2.6 Consumables

## **8 COMPETITIVE LANDSCAPE**

- 8.1 Market Share Analysis, 2016 & 2017
  - 8.1.1 Surgical Robotic Systems by Region
    - 8.1.1.1 North America
    - 8.1.1.2 Europe
    - 8.1.1.3 Asia Pacific
    - 8.1.1.4 Latin America
    - 8.1.1.5 Middle East and Africa
  - 8.1.2 Surgical Robotic Systems by Product
    - 8.1.2.1 Systems
    - 8.1.2.2 Consumables
    - 8.1.2.3 Accessories
  - 8.1.3 Conventional Minimally Invasive Surgical Equipment by Region
    - 8.1.3.1 North America
    - 8.1.3.2 Europe
    - 8.1.3.3 Asia Pacific
    - 8.1.3.4 Latin America
    - 8.1.3.5 Middle East and Africa
  - 8.1.4 Conventional Minimally Invasive Surgical Equipment by Product
    - 8.1.4.1 Endoscopes
    - 8.1.4.1 Laparoscopes
    - 8.1.4.1 Consumables and Accessories
- 8.2 Growth Share Matrix
  - 8.2.1 Surgical Robotic Systems
  - 8.2.2 Conventional Minimally Invasive Surgical Equipment
- 8.3 Comprehensive Competitive Index
  - 8.3.1 Surgical Robotic Systems
  - 8.3.2 Conventional Minimally Invasive Surgical Equipment
- 8.4 Competitor Value Chain Analysis
- 8.5 Competitor Supply Chain Analysis
- 8.6 Competitor Brand-Value Matrix

## **9 MINIMALLY INVASIVE SURGICAL SYSTEMS MARKET BY PRODUCT, 2016-2025**

### **9.1 Surgical Robotic Systems (Installation Volume and Revenue)**

#### **9.1.1 Systems/Console**

#### **9.1.2 Consumables**

#### **9.1.3 Accessories**

#### **9.1.4 Software**

#### **9.1.5 Services**

### **9.2 Conventional Minimally Invasive Surgical Equipment (Sales Volume and Revenue)**

#### **9.2.1 Endoscopy**

##### **9.2.1.1 Rigid Endoscopes**

###### **9.2.1.1.1 Laparoscopes**

###### **9.2.1.1.2 Arthroscopes**

###### **9.2.1.1.3 Urology Endoscopes**

###### **9.2.1.1.4 Cystoscopes**

###### **9.2.1.1.5 Gynaecology Endoscopes**

###### **9.2.1.1.6 Neuroendoscopes**

###### **9.2.1.1.7 Other Rigid Endoscopes**

##### **9.2.1.2 Flexible Endoscopes**

###### **9.2.1.2.1 Upper Gastrointestinal Endoscopes**

###### **9.2.1.2.2 Colonoscopes**

###### **9.2.1.2.3 Bronchoscopes**

###### **9.2.1.2.4 Sigmoidoscopes**

###### **9.2.1.2.5 Laryngoscopes**

###### **9.2.1.2.6 Pharyngoscopes**

###### **9.2.1.2.7 Duodenoscopes**

###### **9.2.1.2.8 Nasopharyngoscopes**

###### **9.2.1.2.9 Rhinoscopes**

###### **9.2.1.2.10 Capsule Endoscopes**

###### **9.2.1.2.11 Other Flexible Endoscopes**

##### **9.2.1.3 Components and Accessories**

###### **9.2.1.3.1 Video and Visualization Systems**

###### **9.2.1.3.1.1 Endoscopy Cameras**

###### **9.2.1.3.1.1.1 Single-Chip Cameras**

###### **9.2.1.3.1.1.2 3-Chip Cameras**

###### **9.2.1.3.1.1.2.1 HD Cameras**

###### **9.2.1.3.1.1.2.2 3D Cameras**

###### **9.2.1.3.1.1.2.3 4K Cameras**

- 9.2.1.3.1.2 Displays and Monitors
  - 9.2.1.3.1.2.1 Wireless
    - 9.2.1.3.1.2.1.1 LED
    - 9.2.1.3.1.2.1.2 LCD
    - 9.2.1.3.1.2.1.3 OLED
  - 9.2.1.3.1.2.2 Wired
    - 9.2.1.3.1.2.2.1 LED
    - 9.2.1.3.1.2.2.2 LCD
    - 9.2.1.3.1.2.2.3 OLED
  - 9.2.1.3.1.2.3 Head-Mounted Display
- 9.2.1.3.1.3 Video Convertors
- 9.2.1.3.1.4 Video Recorders
  - 9.2.1.3.1.4.1 Standalone
  - 9.2.1.3.1.4.2 Inbuilt
- 9.2.1.3.1.5 Video Processors
- 9.2.1.3.1.6 Camera Heads
  - 9.2.1.3.1.6.1 CCD
  - 9.2.1.3.1.6.2 CMOS
- 9.2.1.3.1.7 Light Sources
  - 9.2.1.3.1.7.1 LED
  - 9.2.1.3.1.7.2 Xeon
  - 9.2.1.3.1.7.3 Laser
  - 9.2.1.3.1.7.4 Halogen
- 9.2.1.3.1.8 Transmitters and Receivers
- 9.2.1.3.2 Printers
- 9.2.1.3.3 Insufflators
- 9.2.1.3.4 Carts
- 9.2.1.3.5 Others (Digital Capture Systems, Recorders, Couplers & Splitters, among others)
- 9.2.2 Laparoscopy
  - 9.2.2.1 Laparoscopes
  - 9.2.2.2 Energy Devices
  - 9.2.2.3 Insufflators
  - 9.2.2.4 Suction or Irrigation Systems
  - 9.2.2.5 Closure Devices
  - 9.2.2.6 Hand Instruments
  - 9.2.2.7 Access Devices
  - 9.2.2.8 Accessories
  - 9.2.2.9 Others

### 9.2.3 Operating Room (OR) Systems

#### 9.2.3.1 Trend Analysis

##### 9.2.3.1.1 Integrated OR

##### 9.2.3.1.2 Hybrid OR

##### 9.2.3.1.3 Digital OR

#### 9.2.3.2 Fully Integrated OR System

#### 9.2.3.3 Components and Standalone Devices

##### 9.2.1.3.3.1 Video Routing Devices

###### 9.2.1.3.3.1.1 HD

###### 9.2.1.3.3.1.2 4K

##### 9.2.1.3.3.2 Image Management System

##### 9.2.1.3.3.3 Audio and Video Management System

##### 9.2.1.3.3.4 Recording and Documentation System

## **10 MINIMALLY INVASIVE SURGICAL SYSTEMS MARKET BY APPLICATION, 2016-2025**

### 10.1 Surgical Robotic Surgery

#### 10.1.1 General Surgery

#### 10.1.2 Interventional Cardiology

#### 10.1.3 Gynaecology Surgery

#### 10.1.4 Orthopaedic Surgery

#### 10.1.5 Urologic Surgery

#### 10.1.6 Bariatric Surgery

#### 10.1.7 Neurological Surgery

#### 10.1.8 Others

### 10.2 Conventional Minimally Invasive Surgery

#### 10.2.1 General Surgery

#### 10.2.2 Cardiology

#### 10.2.3 Gynaecology Surgery

#### 10.2.4 Orthopaedic Surgery

#### 10.2.5 Urologic Surgery

#### 10.2.6 Bariatric Surgery

#### 10.2.7 Neurological Surgery

#### 10.2.8 Others

## **11 MINIMALLY INVASIVE SURGICAL SYSTEMS MARKET BY END-USERS, 2016-2025**

## 11.1 Hospitals

### 11.1.1 Surgical Robotic Systems

### 11.1.2 Conventional Minimally Invasive Surgical Equipment

## 11.2 Ambulatory Surgical Centers/Clinics

### 11.2.1 Surgical Robotic Systems

### 11.2.2 Conventional Minimally Invasive Surgical Equipment

## 11.3 Others

### 11.3.1 Surgical Robotic Systems

### 11.3.2 Conventional Minimally Invasive Surgical Equipment

## **12 MINIMALLY INVASIVE SURGICAL SYSTEMS MARKET BY REGION, 2017-2025**

### 12.1 Global Scenario

#### 12.1.1 Overview: Global Minimally Invasive Surgical Systems Market

#### 12.1.2 Overview: Global Surgical Robotics Market

#### 12.1.3 Exponentially growing Surgical Robotics Market

#### 12.1.4 Conventional Minimally Invasive Surgical Equipment Market

### 12.2 North America- Some of the Recent Developments

#### 12.2.1 Surgical Robotic Systems Market, 2017-2025

#### 12.2.2 Conventional Minimally Invasive Surgical Equipment Market, 2017-2025

#### 12.2.3 North America by Country

##### 12.2.3.1 North America

##### 12.2.3.2 Some of the Consortiums/Associations in Surgical Robotics in North America

#### 12.2.4 North America Conventional Minimally Invasive Surgical Equipment Market by Country (\$Million)

#### 12.2.5 North America Conventional Minimally Invasive Surgical Equipment Market by Product (\$Million)

#### 12.2.6 The U.S.

##### 12.2.6.1 The U.S. Surgical Robotics Market, 2017-2025

##### 12.2.6.2 U.S. Conventional Minimally Invasive Surgical Equipment Market

##### 12.2.6.3 U.S. Conventional Minimally Invasive Surgical Equipment Market by Product

#### 12.2.7 Canada

##### 12.2.7.1 Canada Surgical Robotics Systems Market (\$Million)

##### 12.2.7.2 Canada Conventional Minimally Invasive Surgical Equipment Market by Product (\$Million)

### 12.3 Europe

#### 12.3.1 Europe Surgical Robotics Market, 2017-2025

#### 12.3.2 Europe Surgical Robotics Market by Country

12.3.3 Europe Conventional Minimally Invasive Surgical Equipment Market by Country (\$Million)

12.3.4 Europe Conventional Minimally Invasive Surgical Equipment Market by Product (\$Million)

12.3.5 The U.K.

12.3.5.1 U.K. Surgical Robotics Market, 2017-2025

12.3.5.2 U.K. Conventional Minimally Invasive Surgical Equipment Market, 2017-2025

12.3.6 Germany

12.3.6.1 Germany Surgical Robotics Market, 2017-2025

12.3.6.2 Germany Conventional Minimally Invasive Surgical Equipment Market, 2017-2025

12.3.7 France

12.3.7.1 France Surgical Robotics Market, 2017-2025

12.3.7.2 France Conventional Minimally Invasive Surgical Equipment Market, 2017-2025

12.3.8 Italy

12.3.8.1 Italy Surgical Robotics Market, 2017-2025

12.3.8.2 Italy Conventional Minimally Invasive Surgical Equipment Market (\$Million)

12.3.8.3 Italy Conventional Minimally Invasive Surgical Equipment Market by Product (\$Million)

12.3.9 Spain

12.3.9.1 Spain Surgical Robotics Market, 2017-2025

12.3.9.2 Spain Conventional Minimally Invasive Surgical Equipment Market

12.3.10 The Netherlands

12.3.10.1 The Netherlands Surgical Robotics Market, 2017-2025

12.3.10.2 The Netherlands Conventional Minimally Invasive Surgical Equipment Market

12.3.11 Belgium

12.3.11.1 Belgium Surgical Robotics Market, 2017-2025

12.3.11.2 Belgium Conventional Minimally Invasive surgical systems market (\$Million)

12.3.11.3 Belgium Conventional Minimally Invasive surgical systems market, by Product (\$Million)

12.4 Asia Pacific

12.4.1 Asia-Pacific Surgical Robotics Market

12.4.2 Asia-Pacific Surgical Robotics Market by Country

12.4.3 Asia Pacific (Qualitative Data)

12.4.4 Asia Pacific Conventional Minimally Invasive surgical systems market

#### 12.4.5 India

12.4.5.1 India Surgical Robotics Market, 2017-2025

12.4.5.2 India Conventional Minimally Invasive surgical systems market (\$Million)

12.4.5.3 India Conventional Minimally Invasive surgical systems market, by Product (\$Million)

#### 12.4.6 China

12.4.6.1 China Surgical Robotics Market, 2017-2025

12.4.6.2 China Conventional Minimally Invasive surgical systems market (\$Million)

#### 12.4.7 Japan

12.4.7.1 Japan Surgical Robotics Market, 2017-2025

12.4.7.2 Japan Conventional Minimally Invasive surgical systems market (\$Million)

#### 12.4.8 South Korea

12.4.8.1 South Korea Surgical Robotics Market, 2017-2025

12.4.8.2 South Korea Conventional Minimally Invasive surgical systems market (\$Million)

#### 12.4.9 Australia

12.4.9.1 Australia Surgical Robotics Market, 2017-2025

12.4.9.2 Australia Conventional Minimally Invasive surgical systems market (\$Million)

#### 12.4.10 Malaysia

12.4.10.1 Malaysia Surgical Robotics Market, 2017-2025

12.4.10.2 Malaysia Conventional Minimally Invasive surgical systems market (\$Million)

#### 12.4.11 Rest of Asia Pacific

12.4.11.1 Surgical Robotic Systems (Installation Volume and Revenue)

12.4.11.2 Conventional Minimally Invasive Surgical Equipment

#### 12.5 Latin America

##### 12.5.1 Brazil

12.5.1.1 Surgical Robotic Systems (Installation Volume and Revenue)

12.5.1.2 Conventional Minimally Invasive Surgical Equipment

##### 12.5.2 Mexico

12.5.2.1 Surgical Robotic Systems (Installation Volume and Revenue)

12.5.2.2 Conventional Minimally Invasive Surgical Equipment

##### 12.5.3 Rest of Latin America

12.5.3.1 Surgical Robotic Systems (Installation Volume and Revenue)

12.5.3.2 Conventional Minimally Invasive Surgical Equipment

#### 12.6 Middle East and Africa

##### 12.6.1 Kingdom of Saudi Arabia (KSA)

12.6.1.1 Surgical Robotic Systems (Installation Volume and Revenue)

12.6.1.2 Conventional Minimally Invasive Surgical Equipment

#### 12.6.2 United Arab Emirates (UAE)

##### 12.6.2.1 Surgical Robotic Systems (Installation Volume and Revenue)

##### 12.6.2.2 Conventional Minimally Invasive Surgical Equipment

#### 12.6.3 Israel

##### 12.6.3.1 Surgical Robotic Systems (Installation Volume and Revenue)

##### 12.6.3.2 Conventional Minimally Invasive Surgical Equipment

#### 12.6.4 South Africa

##### 12.6.4.1 Surgical Robotic Systems (Installation Volume and Revenue)

##### 12.6.4.2 Conventional Minimally Invasive Surgical Equipment

#### 12.6.5 Rest of Middle East and Africa

##### 12.6.5.1 Surgical Robotic Systems (Installation Volume and Revenue)

##### 12.6.5.2 Conventional Minimally Invasive Surgical Equipment

## **13 COMPANY PROFILES**

### 13.1 Surgical Robotic Systems

#### 13.1.1 Accuray Inc.

##### 13.1.1.1 Overview

##### 13.1.1.2 Product Mapping

##### 13.1.1.3 Financials
