Global SLAM Technology Market Forecast, 2020-2030

The SLAM technology industry analysis by BIS Research projects the market to grow at a significant CAGR of 49.41% on the basis of revenue during the forecast period from 2020 to 2030. Europe dominated the global SLAM market with a share of 37% in 2019. North America, including the major countries, such as the U.S. and Canada, is another prominent region for the SLAM technology market.

The SLAM technology market is currently witnessing a high growth rate owing to the growing usage for the SLAM technology for augmented reality (AR) applications, rise of new digital technologies such as automation and artificial intelligence, and rising demand for service robot for domestic applications.

However, technical complexities in the implementation of SLAM act as major challenges for the market. The increase in the demand for autonomous drones for BVLOS operations and emergence of self-driven vehicles are expected to create viable opportunities for the global SLAM technology market.
