The global small arms market is expected to witness static growth during the forecast period 2018-2023, due to the rising demand from civilian (self-defense). A wide-range of firearms has been adopted by the defense forces of various nations in regions such as North America, Europe, and Asia-Pacific, among others in order to protect their countries from wars, conflicts, and terrorist activities. Of late, with the rising interests of people in activities such as hunting and shooting along with the rising concern for personal defense, the small arms industry has been observing a robust growth. For instance, trends such as trophy hunting or target shooting have become popular in major countries around the world. Moreover, the various regions of the world are increasing their defense expenditure to be more stable and competitive at the global level. The increasing defense budget of the countries is expected to drive the global small arms market.

According to BIS Research analysis, the global small arms market generated \$8.37 billion in 2018 and is estimated to grow at a CAGR of 3.51%, during 2018-2023. North America dominated the global small arms market in 2017, with the U.S. acquiring the most significant market share, globally. However, Asia-Pacific is expected to have the highest growth rate during the forecast period, 2018-2023.
