## Global Stem Cell Therapy Market Forecast, 2019-2029

The Global Stem Cell Therapy Industry Analysis by BIS Research projects the market to grow at a significant CAGR of 27.99% during the forecast period, 2019-2029.

The global stem cell therapy market growth has been primarily attributed to the major drivers in this market such as increasing prevalence of chronic diseases, rising number of clinical trials for cell-based therapy, steady investment and consolidation in the regenerative medicine market, and favorable regulatory environment. The market is expected to grow at a significant growth rate due to the opportunities that lie within its domain, which include product approvals, declining product price and increasing adoption rate. However, there are significant challenges which are restraining the market growth. High treatment cost, exorbitant cost required for set up, and ethical considerations related to the use of embryonic stem cells are the challenges faced by the market.
