Global Synthetic Hormones Market Overview

The market size was estimated at \$19.40 billion in 2023 and is expected to reach \$38.08 billion by 2033, growing at a CAGR of 6.98% during the forecast period 2023-2033. The market's trajectory is fuelled by the promise of a novel breakthrough in the global synthetic hormones market, as numerous key players in the market are actively engaged in the pursuit of developing novel synthetic hormones.

Market Lifecycle Stage

The global synthetic hormones market is currently in a mature stage, characterized by steady growth, well-established market players, and a broad range of products catering to various medical needs. Despite its maturity, the market continues to evolve, driven by ongoing research and development efforts that focus on improving the safety and effectiveness of synthetic hormones. Innovations in drug delivery systems, the advent of bioidentical hormones, and a growing emphasis on personalized medicine are key factors that keep the market dynamic.

Industry Impact

The global synthetic hormones market significantly impacts the healthcare industry by

offering crucial therapeutic solutions for a myriad of hormonal disorders and conditions. Its expansive range of applications, from treating menopause symptoms and hormonal imbalances to aiding in birth control and gender-affirming treatments, has made it an indispensable part of modern healthcare. This market's growth has spurred considerable research and development investments, leading to innovative drug formulations and delivery methods that enhance efficacy and minimize side effects.

The global synthetic hormones market exerts a varied regional impact, reflecting differences in healthcare infrastructure, regulatory environments, and cultural attitudes toward hormone therapies. In North America and Europe, where the market is highly developed, there's a strong emphasis on advanced treatment options and personalized medicine, leading to the wide adoption of synthetic hormones for various therapies, including hormone replacement and contraception. These regions, with their robust healthcare systems and high healthcare spending, also drive significant research and innovation in the field. In contrast, regions such as Asia-Pacific are experiencing rapid growth in the market, fuelled by increasing awareness of hormonal health, expanding healthcare infrastructure, and rising disposable incomes.

Market Segmentation:

Segmentation 1: by Product Type

Steroid Hormones

Peptide Hormones

Others

Peptide Hormones to Dominate the Global Synthetic Hormones Market (by Product Type)

The peptide hormones segment dominated the global synthetic hormones market (by product type) in 2022. The dominance of peptide hormones in the global synthetic hormones market, categorized by type, and the increasing prevalence of chronic diseases such as diabetes, which often requires insulin therapy (a peptide hormone), has led to significant demand for these treatments. Secondly, advancements in biotechnology have improved the efficacy and safety profile of peptide hormones, making them a preferred choice for both patients and healthcare providers. Additionally,

the growing understanding and treatment of hormonal deficiencies and the expanding applications of peptide hormones in both therapeutic and diagnostic fields have further bolstered their market prominence.

Segmentation 2: by Route of Administration

Subcutaneous

Oral

Intravenous/Intramuscular

Others

Subcutaneous to Dominate the Global Synthetic Hormones Market (by Route of Administration)

Subcutaneous route of administration dominated the global synthetic hormones market (by route of administration) in 2022 due to its advantages in terms of efficacy, convenience, and patient compliance. Subcutaneous injections allow for the direct delivery of synthetic hormones into the fatty tissue beneath the skin, ensuring a more controlled and sustained release of the medication into the bloodstream. This method is particularly advantageous for long-term treatments, such as hormone replacement therapy, and chronic conditions, such as diabetes, where regular dosing is essential.

Segmentation 3: by Application

Diabetes

Growth Hormone Deficiency

Contraception

Male Hypogonadism

Menopause

Others

Diabetes to Dominate the Global Synthetic Hormones Market (by Application)

The global synthetic hormones market (by application) was dominated by the diabetes segment in 2022. This trend is largely driven by the escalating global prevalence of diabetes, particularly Type 1 and advanced Type 2, which require insulin therapy. Insulin, a critical synthetic hormone for diabetes management, has seen a surge in demand due to the growing diabetic population, increased awareness and better diagnostic practices leading to earlier and more frequent treatment initiation.

Segmentation 4: by End User

Hospital Pharmacies

Retail Pharmacies

Online Pharmacies

Hospital Pharmacies to Continue its Dominance in the Global Synthetic Hormones Market (by End User)

The hospital pharmacies segment accounted for the largest share of the global synthetic hormones market (by end user) in 2022. This is due to their critical role in providing comprehensive healthcare services. Hospital pharmacies are integral to the healthcare system, ensuring the availability and management of a wide range of medications, including synthetic hormones. Their proximity to diagnostic and treatment centers enables immediate and coordinated care, which is particularly vital for conditions requiring hormone therapies. Hospitals often deal with acute and severe cases where immediate hormone therapy, such as insulin for diabetes or emergency hormonal treatments, is essential.

Segmentation 5: by Region

North America

Europe

Asia-Pacific

Latin America

Rest-of-the-World

The synthetic hormones market in the North America region is expected to witness significant growth of 6.76% during the forecast period, marked by the high incidence of hormonal disorders, technological advancements, and high research and development investments. In 2022, Asia-Pacific accounted for a share of 32.64% of the global synthetic hormones market.

Demand – Drivers, Restraints, and Opportunities

Market Drivers:

Increasing Prevalence of Hormonal Disorders: The increasing occurrence of hormonal disorders, including hypothyroidism, diabetes, and imbalances, plays a crucial role in propelling the synthetic hormones market. According to the World Health Organization (WHO), millions of individuals globally are impacted by hormonal disorders, resulting in an escalating need for hormone replacement therapies. With the ongoing aging of the global population and shifts in lifestyles, the prevalence of hormonal disorders is anticipated to grow, driving the demand for synthetic hormones to address and manage these conditions.

Market Restraints:

High Cost of Synthetic Hormone Development and Therapy: The high cost of synthetic hormone therapy can be a major obstacle to their development and accessibility, posing challenges for both health and the synthetic hormone industry. The complexity of designing and synthesizing hormone compounds, conducting comprehensive safety and efficacy evaluations, and navigating stringent regulatory frameworks adds to the financial burden.

Market Opportunities:

Expanding Applications of Synthetic Hormone in Various Indications: The exploration of synthetic hormones for a broader range of medical indications allows the market to

diversify its reach beyond traditional applications. This diversification creates new avenues for growth, enabling synthetic hormone manufacturers to tap into different segments of the healthcare industry and reach a more extensive patient population. It also provides an opportunity to address unmet medical needs in various therapeutic areas. As researchers and pharmaceutical companies explore the potential of synthetic hormones in different indications, they can identify gaps in current treatment options and develop novel solutions to meet the specific needs of patients with previously underserved.

How can this report add value to an organization?

Workflow/Innovation Strategy: The synthetic hormones market (by product type) has been segmented based on product type, including peptide hormones, steroid hormones, and others. Moreover, the study provides the reader with a detailed understanding of the different routes of administration and application.

Growth/Marketing Strategy: To foster growth in the global synthetic hormones market, a dual strategy focusing on research and development for safer, more effective formulations, alongside expanding global outreach through strategic partnerships and education campaigns, is essential. Emphasizing personalized medicine and leveraging digital platforms for market expansion and patient engagement can also be pivotal in driving market growth and visibility.

Competitive Strategy: Key players in the global synthetic hormones market have been analyzed and profiled in the study, including manufacturers involved in new product launches, acquisitions, expansions, and strategic collaborations. Moreover, a detailed competitive benchmarking of the players operating in the global synthetic hormones market has been done to help the reader understand how players stack against each other, presenting a clear market landscape.

Methodology

Key Considerations and Assumptions in Market Engineering and Validation

The base year considered for the calculation of the market size is 2022. The historical year analysis has been done from FY2020 to FY2021, and the market size has been calculated for FY2022 and projected for the period 2023-2033.

The geographical distribution of the market revenue is estimated to be the same

as the company's net revenue distribution. All the numbers are adjusted to two digits after decimals for report presentation reasons. However, the real figures have been utilized for compound annual growth rate (CAGR) estimation. CAGR is calculated from 2023 to 2033.

The market has been mapped based on different types of products available in the market and based on several indications. All the key manufacturing companies that have a significant number of offerings to the synthetic hormones market have been considered and profiled in the report.

In the study, the primary respondent's verification has been considered to finalize the estimated market for the synthetic hormone market.

The latest annual reports of each market player have been taken into consideration for market revenue calculation.

Market strategies and developments of key players have been considered for the calculation of sub-segment split.

The base currency considered for the market analysis is US\$. Currencies other than the US\$ have been converted to the US\$ for all statistical calculations, considering the average conversion rate for that particular year. The currency conversion rate has been taken from the historical exchange rate of the Oanda website or from the annual reports of the respective company, if stated.

Primary Research

The key data points taken from the primary sources include:

Validation and triangulation of all the numbers and graphs

Validation of the report's segmentation and key qualitative findings

Understanding of the numbers of the various markets for market type

Percentage split of individual markets for regional analysis

Secondary Research

Open Sources

World Health Organization (WHO), PubMed, and National Center for Biotechnology Information (NCBI), Food and Drug Administration (FDA)

Annual reports, SEC filings, and investor presentations of the leading market players

Company websites and detailed study of their portfolio

Gold standard magazines, journals, whitepapers, press releases, and news articles

Databases

The key data points taken from the secondary sources include:

Segmentations, split-ups, and percentage shares

Data for market value

Key industry trends of the top players in the market

Qualitative insights into various aspects of the market, key trends, and emerging areas of innovation

Quantitative data for mathematical and statistical calculations

Key Market Players and Competition Synopsis

The global synthetic hormones market includes a diverse range of products designed to mimic natural hormones in the human body. These synthetic hormones are widely used for various therapeutic purposes, including hormone replacement therapy (HRT), contraception, and treatment of endocrine disorders. The market is driven by factors such as the increasing prevalence of hormonal imbalance disorders, the aging global

population, and advancements in biotechnology that have improved the efficacy and safety of synthetic hormones.

Key factors driving this expansion include the rising awareness about gender-affirming treatments and the growing demand for effective contraception methods, which are contributing to the market's expansion. The development of new delivery systems and formulations that enhance patient compliance and reduce side effects further fuels the market growth. However, concerns over the potential side effects of long-term hormone use and stringent regulatory frameworks can pose challenges to market expansion. Overall, the synthetic hormones market is expected to continue growing, driven by the need for effective treatments for hormonal disorders and the ongoing research and development in this field.

Some of the prominent companies in this market are:

Eli Lilly and Company

Ferring B.V.

Bayer AG

Pfizer Inc.

Novo Nordisk A/S

Ipsen Pharma

Novartis AG

AbbVie, Inc.

Changchun GeneScience Pharmaceutical Co., Ltd.

Perrigo Company plc

Sanofi

Teva Pharmaceutical Industries Limited

Viatis Inc.

Companies that are not a part of the aforementioned pool have been well-represented across different sections of the report (wherever applicable).

Executive Summary
Scope and Definition

1 MARKETS

- 1.1 Trends: Current and Future Impact Assessment
 - 1.1.1 Trend 1: Personalized Synthetic Hormones Therapies
 - 1.1.2 Trend 2: Integration of Artificial Intelligence (AI)
- 1.2 Market Footprint and Growth Potential, \$Billion, 2022-2033
- 1.3 Research and Development Review
 - 1.3.1 Patent Publishing Trend (by Country)
 - 1.3.2 Patent Publishing Trend (by Year)
- 1.4 Regulatory Landscape
- 1.5 Market Dynamics: Overview
 - 1.5.1 Market Drivers
 - 1.5.2 Market Restraints
 - 1.5.3 Market Opportunities

2 GLOBAL SYNTHETIC HORMONES MARKET (BY PRODUCT TYPE)

- 2.1 Market Overview
 - 2.1.1 Peptide Hormones
 - 2.1.2 Steroid Hormones
 - 2.1.3 Others

3 GLOBAL SYNTHETIC HORMONES MARKET (BY ROUTE OF ADMINISTRATION)

- 3.1 Market Overview
 - 3.1.1 Subcutaneous
 - 3.1.2 Oral
 - 3.1.3 Intravenous/Intramuscular
 - 3.1.4 Others

4 GLOBAL SYNTHETIC HORMONES MARKET (BY APPLICATION)

- 4.1 Market Overview
 - 4.1.1 Diabetes

- 4.1.2 Growth Hormone Deficiency
- 4.1.3 Contraception
- 4.1.4 Male Hypogonadism
- 4.1.5 Menopause
- 4.1.6 Others

5 GLOBAL SYNTHETIC HORMONES MARKET (BY END USER)

- 5.1 Market Overview
 - 5.1.1 Hospital Pharmacies
 - 5.1.2 Retail Pharmacies
 - 5.1.3 Online Pharmacies
