Abstracts

Global Animal Disinfectants Market is valued approximately at USD 2.8 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 7.20% over the forecast period 2021-2027. Animal disinfectants are specially developed animal care product which are globally used in the companion animal veterinary clinics and livestock production. The Animal Disinfectants market is being driven by rising incidences of diseases in livestock, increasing regulations concerning terminal disinfection to curb potential outbreaks. Furthermore, the production and consumption of beef and veal products globally is increasing the demand for efficient biosecurity and hygienic practices. For instance, according to the US Department of Agriculture, the global production of beef and veal products was around 61.54 million tons as of April 2021. Therefore, as the demand of meat products is increasing, the need for healthy livestock is also rising hence resulting in the surge of Animal Disinfectant Market. However, high costs and long duration associated with the development of disinfectant compounds may impede market growth over the forecast period of 2021-2027.

The regional analysis of the Animal Disinfectants Market is considered for the key

regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific has emerged as a significant region across the world in terms of market share due to growing population and awareness towards the healthy products. Whereas North America is also anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to focus on the good hygienic practicing and growing awareness towards livestock disease prevention.
