## Abstracts

Asia Pacific Dental Polishing Machine Market is valued at approximately USD 820 million in 2023 and is anticipated to grow with a healthy growth rate of more than 8.38 % over the forecast period 2024-2032. The Dental Polishing Machine is a specialized device used by dentists to smooth and polish the surfaces of teeth. It typically consists of a hand tool with a rotating brush or rubber cup, often used in conjunction with polishing paste. The machine aids in removing plaque, stains, and surface irregularities, resulting in smooth and shiny teeth. Polishing not only enhances the appearance of teeth but also helps maintain oral hygiene by reducing plaque buildup and preventing gum disease. Dental polishers are essential for routine teeth cleaning and cosmetic dentistry, contributing to both the aesthetic and health aspects of dental care. The market for dental polishing machines is expanding due to increased awareness of oral hygiene and the growing popularity of cosmetic dental procedures. Consumers are increasingly seeking professional dental care to achieve brighter, healthier smiles. Additionally, technological advances in dental equipment have led to the development of more efficient and user-friendly polishing machines, increasing their appeal and adoption among dentists.

Increasing awareness of oral health and hygiene in countries such as Japan, China, and India is promoting regular dental care visits and cosmetic procedures, thereby boosting demand for polishing machines. Rapid urbanization and rising disposable incomes are expanding the middle-class population, enabling them to afford advanced dental treatments. Technological advancements in dental equipment, particularly in

Japan and South Korea, are enhancing the efficiency and effectiveness of polishing machines, further driving market growth. Additionally, government initiatives to improve healthcare infrastructure and expand access to dental services in emerging economies are creating new opportunities for market expansion in the APAC region. However, varying regulatory frameworks across different countries can complicate market entry and product approvals. Economic disparities and healthcare infrastructure challenges in some developing countries may also limit the widespread adoption of advanced dental equipment, impacting market growth.

The key Countries considered for the Asia Pacific Dental Polishing Machine market study includes China, India, Japan, South Korea, Australia and Rest of Asia Pacific. In 2023, Japan leads the Dental Polishing Machine Market in the APAC region in terms of revenue due to its advanced healthcare infrastructure and strong dental care awareness. The country's substantial investments in dental treatments and continuous advancements in technology drive the adoption of sophisticated polishing machines. Japan's role as a leader in technological innovation ensures that the market stays ahead in dental equipment development, meeting the needs of both practitioners and patients. This leadership fosters a competitive market environment, encouraging further innovation and improvements in dental care technologies. On the other hand, the market in China is expected to develop at the fastest rate over the forecast period.

Major market player included in this report are:

Morita Corporation

NSK Ltd.

DentALEZ Group

J. Morita Mfg. Corp.

GC Corporation

Dentsply Sirona Japan Co., Ltd.

FONA Dental

Sinol Dental Limited

Being Foshan Medical Equipment Co., Ltd.

Takara Belmont Corporation

The detailed segments and sub-segment of the market are explained below:

By Machine Type

Electric Polishing Machine

Handheld Polishing Machine

Others

By Application

Dentist Clinics

Dental Research Facility

Others

By Region:

Asia Pacific

China

India

Japan

Australia

South Korea

RoAPAC

Years considered for the study are as follows:

Historical year – 2022

Base year – 2023

Forecast period – 2024 to 2032

Key Takeaways:

Market Estimates & Forecast for 10 years from 2022 to 2032.

Annualized revenues and country level analysis for each market segment.

Detailed analysis of geographical landscape with Country level analysis of major regions.

Competitive landscape with information on major players in the market.

Analysis of key business strategies and recommendations on future market approach.

Analysis of competitive structure of the market.

Demand side and supply side analysis of the market.
